SUBJECT INDEX

Accuracy
  Reproducibility study on feedstuff control, 986
Acetic acid
  Effect of negative ions on *E. coli*, 204
  Inactivation of *L. monocytogenes* on frankfurters, 1594
  Synergistic effect between antibacterials, 1704
Acetylsalicylic acid
  Aspirin affects *C. botulinum* growth and toxin production, 2860
Acid adaptation
  Growth and acid resistance of *L. monocytogenes* on bologna, 65
Acid challenge
  Impact of antibiotic stress, 194
Acidified sodium chlorite
  Chemical decontaminants against pathogenic bacteria on poultry, 2063
Acidified vegetables
  Safety of acidified cucumbers, 2638
Acrylamide
  Acrylamide in breaded chicken products, 466
Acrylic acid
  Acrylamide in breaded chicken products, 466
Additives
  Salmonella inactivation in LWE by irradiation, heat, and additives, 1402
Adhesion
  Adhesion of *L. monocytogenes* to inert surfaces, 1569
  Dadih isolated strain properties against pathogen adhesion, 700
  Damage to *B. cereus* exosporium, 2346
  Lactobacillus spp. adhesion and chemokine stimulation, 125
Adhesive film
  Transfer of *Listeria*, 600
Adsorption
  AFB_1 binding by lactic acid bacteria and *S. cerevisiae*, 2148
  Ochratoxin A removal by wine lactic acid bacteria, 2155
Aerobic
  Aerobic resuscitation of *Campylobacter*, 1099
Aerobic plate count(s)
  APC, *E. coli* O157:H7, *Salmonella*, and non-O157 STEC in lamb, 1811
  Imported beef trim, 440
Aerosol
  L. innocua in aerosol studies, 1857
Aerosolized microorganisms
  Effect of ozone and OAF on *M. luteus*, 2769
Aflatoxin(s)
  Aflatoxins in foods in Trinidad, 771
  Aflatoxins in Turkish dried figs, 1029
  Identity and toxigenicity of *A. oryzae* and *A. sojae*, 2916
Aflatoxin B_1
  AFB_1 binding by lactic acid bacteria and *S. cerevisiae*, 2148
  Natural occurrence and risk estimates for aflatoxin B_1, 2824
Aggregation
  Factors influencing aggregation of *L. delbrueckii* subsp. *bulgaricus*, 223
  Lactobacillus spp. adhesion and chemokine stimulation, 125
Aggregation substance
  Safety of enterococci from Terrincho cheesemaking, 2161
Agricultural infrastructure
  Agroterrorism: Where are we in the ongoing war on terrorism?, 791
Air
  L. innocua in aerosol studies, 1857
Air chilling
  Chilling of poultry, 1829
Aldehydes
  Antimicrobial properties of films containing essential oils, 901
Alfalfa seeds
  Heat inactivation of *E. coli* O157:H7 and *Salmonella* on alfalfa seeds, 1698
Alfalfa sprouts
  Heat inactivation of *E. coli* O157:H7 and *Salmonella* on alfalfa seeds, 1698
Alheira
  Sources of *S. aureus* contamination in alheira, 685
Allergen
  Sesame seed detection in foods, 1033
Allergy
  An assay to detect mustard seed protein, 179
Almond
  Salmonella in raw almonds, 820
Alternative antimicrobials
  Alternative antimicrobials for food safety and hygiene, 425
Amalgamation
  Interlaboratory bias in the determination of mercury, 2422
Amplified fragment length polymorphism (AFLP)
  L. monocytogenes contamination in a chilled food plant, 1866
Anatoxin-a
  Anatoxin-a in food supplements, 776
Animal
  E. coli O157:H7 on diverse farms, 6
Animal feed
  Aflatoxins in foods in Trinidad, 771
  Assessment of two ELISA tests, 692
Animal proteins
  Assessment of two ELISA tests, 692
Anisakid roundworm larvae
  Nematode detection through multispectral imaging, 1890
Antibiotic resistance
  Antibiotic-resistant lactic acid bacteria in meat products, 557
  Antimicrobial resistance of *L. monocytogenes*, 2402
  Campylobacter spp. from meat in Korea, 860
  Dairy enterococci biodiversity and safety, 1561
  Enterotoxigenic and antibiotic-resistant *S. aureus*, 2764
  Persistence of antibiotic-resistant enterococci in raw milk cheese, 450
  Salmonella characterization, 1328
Antibiotic resistance virulence genes
  Antibiotic resistance in broiler chicken production, 1316
Antibiotics
  Impact of antibiotic stress, 194
Antibiotic susceptibility
  Antibiotic susceptibility of animal bifidobacteria, 119
  Antibiotic susceptibility of heterofermentative lactobacilli, 412
Antimicrobial(s)
  Antimicrobial activity of encapsulated eugenol in milk, 2631
  Antimicrobial activity of herbs and spices, 641
  Chinese medicinal herb extracts in raw sheep meat, 1440
  C. perfringens growth in injected turkey during chilling, 923
  Efficacy of peroxyacetic acid formulation, 200
  Enterococcus resistance in organic poultry, 1021
  Inactivation of nonpathogenic *E. coli* via high-pressure homogenization, 1007
  Irradiation of leaf-internalized *E. coli* O157:H7, 2526
  Listeria control in ready-to-eat meats, 214
  Listeria control in ready-to-eat meats, 2306
  Reduction of bacteria from hands to food, 2873
  Transmission of STEC by food, 2426
  Validating antimicrobial interventions for poultry, 1393
Antimicrobial activity
  Antimicrobial dipping against *L. monocytogenes*, 1017
  Antimicrobial properties of tannins, 543
  Enhancing lysozyme activity using immunonanoparticles, 1844
  Inhibition of carvacrol activity in steak tartare, 2127
  Plant extract inhibits bacterial growth in foods, 1600
Antimicrobial drug resistance
  Antimicrobial drug resistance of cattle isolates, 551
Antimicrobial edible film
  Antimicrobial properties of films containing essential oils, 901
Antimicrobial packaging
  Antimicrobial packaging and high pressure to control *L. monocytogenes*, 2498
  Nisin-coated plastic films, 1267
Antimicrobial properties
  Antimicrobial activity of lemon extract, 1896
Antimicrobial resistance

Antimicrobial resistance in *C. jejuni*, 736
Antimicrobial resistance of *C. jejuni*, 729
Antimicrobial-resistant *Salmonella*, 1334
Integron prevalence in *E. coli* from swine and humans, 292
Prevalence of *Salmonella*, 2466
Resistance and genotypes of *Salmonella* strains from food, 2741
Salmonella in raw almonds, 820
Salmonella quinolone resistance in poultry, 2030
Salmonella shedding and antimicrobial resistance in feedlots, 476
Antimicrobial susceptibility
Antimicrobial resistance of *L. monocytogenes*, 2402
Antimicrobial susceptibility of food LAB, 2606
Safety of enterococci from Terrincho cheesemaking, 2161
Antimutagenicity
Mechanisms of antimutagenicity in fermented soymilk, 1025
Antioxidant
Chinese medicinal herb extracts in raw sheep meat, 1440
L. plantarum wine phenolics degradation, 2670
Apple
Effect of negative ions on *E. coli*, 204
Apple-based products
Analysis of patulin in foodstuffs, 2642
Apple cider
Cider manufacturing practices and microbial concentrations, 1187
Influence of essential oils on *E. coli* in apple cider, 2089
Aqueous chlorine
Efficacy of gamma radiation and aqueous chlorine on *E. coli*, 748
Arcobacter
Detection of *Arcobacter* by multiplex PCR, 341
Artificial sweetener
Artificial sweetener effect on *Lactobacillus*, 2413
Ascorbic acid
Quality of irradiated frozen vegetables, 1901
Aspergillus carbonarius
Chemical treatments on ochratoxigenic fungi of grapes, 157
Environmental impact on Greek *A. carbonarius* isolates, 2884
Aspergillus flavus
Bacterial antagonism of *Aspergillus* and *Fusarium*, 1615
Aspergillus flavus group
Identity and toxigenicity of *A. oryzae* and *A. sojae*, 2916
Aspergillus spp.
Antifungal activity of fatty acids, 1206
Aspirin
Aspirin affects *C. botulinum* growth and toxin production, 2860
Atmospheric pressure
Plasma inactivation of pathogens on produce, 2290
Atmospheric pressure chemical ionization
Production of secondary metabolites by terverticillate penicillia, 2829
Atomic absorption spectrophotometry
Heavy metals in canned variegated scallops, 2911
Interlaboratory bias in the determination of mercury, 2422
Atomic force microscope
Transfer of *Listeria*, 1423
Attached cells
Transfer of *Listeria*, 1423
Attachment
Attachment and biofilm formation by *Salmonella*, 2473
Attachment of *E. coli* O157:H7 to lettuce, 1339
Proteome analysis of virulence factor by AI-2–like activity, 300
Transmission of STEC by food, 2426
Attachment/receptor
Binding of recombinant norovirus to gastrointestinal cells in bivalves, 2140
Australia
PCR and biochemical identification of *Listeria* spp., 1874
Autoinducer-2–like activity
Proteome analysis of virulence factor by AI-2–like activity, 300
Automated ribotyping
Tracking of *L. monocytogenes* in a Taleggio plant, 1116
Avian influenza
Thermal inactivation of H5N1 HPAI in chicken meat, 674
Avian influenza virus
Inactivation of avian influenza virus, 667

Bacillus
Psychrotolerant endospore-forming bacteria in milk, 2354
Bacillus cereus
B. cereus and kefir, 2613
B. cereus in dried red pepper, 917
B. cereus in potato products, 514
B. weihenstephanensis in liquid egg products, 2782
Real-time PCR and MPN real-time PCR for *B. cereus* group species, 2774
Bacillus cereus group
Phylogeny of *B. cereus* group isolates from traditional fermented foods, 1165
Bacillus cereus spore exosporium
Damage to *B. cereus* exosporium, 2346
Bacillus circulans
Competitive inhibition of *Salmonella*, 1804
Bacillus subtilis spore
Effect of SASP on spore germination under pressure and heat, 2168
Bacillus weihenstephanensis
B. weihenstephanensis in liquid egg products, 2782
Bacterial concentrations
Cider manufacturing practices and microbial concentrations, 1187
Bacterial identification
Novel infrared bacterial sample preparation protocol, 1241
Bacterial subtyping
Psychrotolerant endospore-forming bacteria in milk, 2354
Bacterial transfer
Biofilm dryness and transfer, 2480
Recovery and transfer of *Salmonella* Typhimurium, 2273
Bactericidal
Bactericidal effects of heated sugars, 373
Food antimicrobials from olives, 1194
Bacteriocin(s)
Antimicrobial packaging and high pressure to control *L. monocytogenes*, 2498
Colicin E1 kills *L. monocytogenes*, 1256
Combined action of AS-48 on *S. aureus*, 405
Effects of enterocin AS-48 on bacilli in vegetable foods, 2339
Heterologous production of pediocin PA-1 in *L. lactis*, 2792
Bacteriophage
Bacteriophage-based enrichment and immunoassay method for *Salmonella*, 2235
Bioluminescent bioreporter for *E. coli* O157:H7, 1386
Food processing resistance in *E. coli* O157, 2617
Baseline study
Swine carcass baseline study, 1790
Basil
Nonthermal treatment of *Cyclospora* surrogate on produce, 2837
BAX system
BAX detection of foodborne salmonellae, 835
Evaluation of *E. sakazakii* detection methods, 1678
Bayesian modeling
Number of *Salmonella* on chicken breast filet and health risk, 2045
Beef
Cattle transport and lairage effects on *E. coli* O157:H7, 280
E. coli O157:H7 outbreak associated with beef donair, 1483
Efficacy of peroxyacetic acid formulation, 200
IMS versus ELISA detection of *E. coli* O157 in cattle and beef samples, 2230
In vitro comparison of methods for sampling of beef carcasses, 930
Beef carcass(es)
E. coli O157:H7 strain relatedness in U.S. beef processing, 1622
Salmonella and indicator bacteria on beef carcasses, 2732
Beef cattle
Antimicrobial drug resistance of cattle isolates, 551

Behavior
Food safety practices among WIC clients, 1230
Behavioral-cognitive theory
Young adult food safety behaviors and cognitions, 1917
Bell pepper
Decontamination of fresh cantaloupes and peppers, 655
Benzoate
Listeria control in ready-to-eat meats, 214
Listeria control in ready-to-eat meats, 2306
Beverages
Food antimicrobials from olives, 1194
Bias
Interlaboratory bias in the determination of mercury, 2422
Bifidobacterium pseudolongum
Antibiotic susceptibility of animal bifidobacteria, 119
Bifidobacterium thermophilum
Antibiotic susceptibility of animal bifidobacteria, 119
Binding model
AFB_1 binding by lactic acid bacteria and *S. cerevisiae*, 2148
Bioaccumulation
Binding of recombinant norovirus to gastrointestinal cells in bivalves, 2140
Bioassay
Ricin detection in beverages, 2377
Biocontrol
Bacterial antagonism of *Aspergillus* and *Fusarium*, 1615
Biodiversity
Dairy enterococci biodiversity and safety, 1561
Biofilm
Attachment and biofilm formation by *Salmonella*, 2473
Biofilm dryness and transfer, 2480
Biofilm formation by multidrug-resistant pathogens, 22
Campylobacter biofilms on stainless steel, 1379
Chlorine tolerance of *L. monocytogenes* cultural variants, 1129
Transfer of *Listeria*, 600
Biofilm assay
Characterization of *L. monocytogenes*, 592
Biological detection
Enzymatic bio-nanotransduction, 841
Biological hazards
Feed industry HACCP, 2819
Bio-nanotransduction
Enzymatic bio-nanotransduction, 841
Biopreservation
Biopreservation of fresh cream cheese with *L. paracasei*, 228
Effects of enterocin AS-48 on bacilli in vegetable foods, 2339
Bioreporter
Bioluminescent bioreporter for *E. coli* O157:H7, 1386
Bison
E. coli O157:H7 in American bison, 2555
Bivalves
Binding of recombinant norovirus to gastrointestinal cells in bivalves, 2140
Blade tenderize
Decontamination of beef cuts intended for mechanical tenderization, 1174
Blood cell concentrate
Stability of cooked sausages made from blood cells, 1181
Blood sausage
Stability of cooked sausages made from blood cells, 1181
"Blown pack" spoilage
Peroxyacetic acid and "blown pack" spoilage, 1434
Blueberries
Microbial reductions on blueberries using chlorine dioxide, 2084
Blue-green algae
Anatoxin-a in food supplements, 776
Bologna
Antimicrobial properties of films containing essential oils, 901
Growth and acid resistance of *L. monocytogenes* on bologna, 65
Listeria control in ready-to-eat meats, 214
Transfer of *Listeria*, 600
Botulinum
C. botulinum toxin from flounder, 1159
Botulinum toxin
Aspirin affects *C. botulinum* growth and toxin production, 2860
Bovine
Cutting plants, 2906
Real-time PCR assay for detection of *Salmonella*, 1080
Bovine mastitic milk
Diversity in enterotoxigenic *S. aureus* from various food sources, 2541
Bovine serum albumin
Inhibition of carvacrol activity in steak tartare, 2127
Bovine spongiform encephalopathy (BSE)
Feed industry HACCP, 2819
Reproducibility study on feedstuff control, 986
Bread
Probiotics and wheat allergy, 135
Broiler chicken(s)
Antibiotic resistance in broiler chicken production, 1316
Antimicrobial susceptibility testing, 1940
Chilling of poultry, 1829
Broiler meat
Number of *Salmonella* on chicken breast filet and health risk, 2045
Broilers
Antimicrobial resistance in *C. jejuni*, 736
Campylobacter clones in broiler farm and processing, 536
Campylobacter on broiler carcasses, 1556
Epidemiology of *Salmonella* in broiler production chain, 323
Logistic broiler processing to reduce *Campylobacter* colonization, 2549
Salmonella in processed chicken and feed, 2251
Swedish *Camplyobacter* program in broilers, 2001 through 2005, 2008
Broth microdilution
Antibiotic susceptibility of animal bifidobacteria, 119

Cabinet
Evaluation of hide wash cabinet, 1076
Caco-2 cells
Characterization of *L. monocytogenes*, 592
Inactivation of probiotics does not affect cytokine responses, 2417
Cadmium
Heavy metals in canned variegated scallops, 2911
Cake mix
Salmonella from cake mix, 997
Calcium hydroxide
Decontamination of fresh cantaloupes and peppers, 655
Callosobruchus chinensis
C. martinii oil as botanical fumigant for insects in stored grain, 172
Campylobacter
Analytical utility of *Campylobacter* methodologies, 241
Antimicrobial resistance of *C. jejuni*, 729
Antimicrobial susceptibility testing, 1940
Bacteria from poultry inhibitory to pathogens, 867
Bacteria on chickens before processing, 2056
Campylobacter clones in broiler farm and processing, 536
Campylobacter contamination after transport, 40
Campylobacter in New Zealand retail meats, 566
Campylobacter on broiler carcasses, 1556
Chicken carcass contamination, 1820
Effect of refrigeration on enumeration of chicken meat pathogens, 739
Enumeration of *C. jejuni* by q-PCR, 1373
Logistic broiler processing to reduce *Campylobacter* colonization, 2549
Macrolide-resistant *Campylobacter*, 1945
Model for inactivation of *Campylobacter*, 2023
Novel isolation method for *Campylobacter*, 355
Pathogen contamination of restricted eggs, 2004
Postinfectious irritable bowel syndrome, 1762
Salmonella and *Campylobacter* in raw chicken, 1937
Swedish *Campylobacter* program in broilers, 2001 through 2005, 2008
Turkey carcass contamination, 1350
Two-dimensional hazard characterization, 363

Campylobacter coli
Campylobacter spp. from meat in Korea, 860
Quantification of *Campylobacter* spp. in raw chickens, 2015
Campylobacter jejuni
Aerobic resuscitation of *Campylobacter*, 1099
Antimicrobial resistance in *C. jejuni*, 736
Campylobacter biofilms on stainless steel, 1379
Campylobacter spp. from meat in Korea, 860
Enumeration of *C. jejuni* by q-PCR, 1373
Quantification of *Camplyobacter* spp. in raw chickens, 2015
Canada
Chicken carcass contamination, 1820
Turkey carcass contamination, 1350
Cantaloupe
Decontamination of fresh cantaloupes and peppers, 655
Washing conditions affect the reduction of *E. coli* O157:H7 populations, 2533
Caprese salad
Prolonging the shelf life of caprese, 722
Carbon dioxide
Carbon monoxide and carbon dioxide in MAP for pork sausage, 937
Carbon monoxide
Carbon monoxide and carbon dioxide in MAP for pork sausage, 937
Carcass contamination
Chilling of poultry, 1829
Carcass(es)
Cattle transport and lairage effects on *E. coli* O157:H7, 280
Decontaminate beef and hog carcasses using a household steam cleaner, 635
Efficacy of peroxyacetic acid formulation, 200
Microbiology of kangaroo carcasses, 1249
Prevalence of *Listeria* in cull cattle at slaughter, 2578
Real-time PCR assay for detection of *Salmonella*, 1080
United Kingdom slaughterhouse hygiene trends, 1633
Validating antimicrobial interventions for poultry, 1393
Carcass hygiene
Assessment of pig carcass hygiene systems, 432
Carcass microbiology
Chilling of poultry, 1829
Carrot
TiO_2/UV photocatalytic disinfection, 97
Carvacrol
C. perfringens control in ground turkey during chilling, 218
Inhibition of carvacrol activity in steak tartare, 2127
Synergistic effect between antibacterials, 1704
Categorized variables
Pathogen detection, 1933
Cattle
Cattle transport and lairage effects on *E. coli* O157:H7, 280
Competitive inhibition of *Salmonella*, 1804
DFM intervention strategy for *E. coli* O157 and *Salmonella*, 2386
DFM intervention strategy for *E. coli* O157 in cattle, 1252
Distribution of *E.coli* O157 and *Salmonella* on cattle, 1346
E. coli in cattle transport trucks, 2383
Enumeration of *E. coli* O157 in cattle feces, 1072
Evaluation of hide wash cabinet, 1076
IMS versus ELISA detection of *E. coli* O157 in cattle and beef samples, 2230
Prevalence of *Listeria* in cull cattle at slaughter, 2578
Sarcocystis hominis in minced beef in Belgium, 1523
VTEC in cattle, 1493
Ceca
Real-time PCR assay for detection of *Salmonella*, 1080
Cell-associated hemolysin
Cell-associated hemolysin in *P. shigelloides*, 885
Cell charge
Attachment of *E. coli* O157:H7 to lettuce, 1339
Cellular fatty acid composition
Cellular fatty acids of *E. coli* as affected by ethanol, 616
Cellular proteins
Effects of lactate and diacetate on proteins in *L. monocytogenes*, 58
Cellulose
Attachment and biofilm formation by *Salmonella*, 2473
Challenge testing
Validation of a growth–no growth model of *L. monocytogenes*, 2118
Charm II tests
Aflatoxins in foods in Trinidad, 771
Cheddar cheese
Determination of quantitative food consumption, 184
Cheese
Cold-storage contamination, 1037
Persistence of antibiotic-resistant enterococci in raw milk cheese, 450
Transfer of *Listeria*, 600
Cheese spread
Inactivation of *Clostridium* spp. by polyphosphate and heat, 744
Chemical characterization
Microbiological safety of Portuguese raw milk cheeses, 1710
Chemical hazards
Feed industry HACCP, 2819
Chemical imaging
Novel infrared bacterial sample preparation protocol, 1241
Chemical preservatives
Validation of a growth–no growth model of *L. monocytogenes*, 2118
Chemokines
Lactobacillus spp. adhesion and chemokine stimulation, 125
Chicken(s)
Antimicrobial resistance of *C. jejuni*, 729
Chicken carcass contamination, 1820
Contamination profile of *Listeria* spp. in RTE chicken products, 85
Control of *C. perfringens* spores by green tea leaf extracts, 1429
Detection of *Arcobacter* by multiplex PCR, 341
Effect of refrigeration on enumeration of chicken meat pathogens, 739
Effects of essential oils of oregano and nutmeg, 2626
Gastrointestinal microbiota of farm animals, 2799
Listeria media and results bias, 2851
Thermal inactivation of H5N1 HPAI in chicken meat, 674
Chicken carcass
Enumeration of *C. jejuni* by q-PCR, 1373
Chicken nuggets and strips
Salmonella in processed chicken and feed, 2251
Chick pea
Radiation processing of sprout seeds, 1961
Chilled food
L. monocytogenes contamination in a chilled food plant, 1866
Chilling
C. perfringens control in ground turkey during chilling, 218
C. perfringens growth in injected turkey during chilling, 923
Prevalence of *Salmonella*, 2466
Chinese herbs extract
Chinese medicinal herb extracts in raw sheep meat, 1440
Chlorate
Chlorate, disinfection, and weaning age affect *Salmonella* in pigs, 1798
Nitro treatments against *Salmonella* and *E. coli*, 308
Chlorine
Chlorine tolerance of *L. monocytogenes* cultural variants, 1129
Chlorine dioxide
Microbial reductions on blueberries using chlorine dioxide, 2084
Preventing fruit contamination with ClO_2, 629
Chromogenic agar
Evaluation of *E. sakazakii* detection methods, 1678
Cinnamaldehyde
C. perfringens control in ground turkey during chilling, 218
Cinnamon
Natural antimicrobials in pasteurized semiskimmed milk, 2757
Ciprofloxacin
Depletion of enrofloxacin and ciprofloxacin in white leghorn hens, 1952
Citral
L. monocytogenes inactivation by ultrasound and natural antimicrobials, 1850
Citric acid
Chemical decontaminants against pathogenic bacteria on poultry, 2063

Class 1 integron
Antibiotic resistance in broiler chicken production, 1316
Classification
Identity and toxigenicity of *A. oryzae* and *A. sojae*, 2916
Cleaning implements
Implements as reservoirs for bacterial contamination of some RTE foods, 2878
Clinical isolates
Antimicrobial resistance of *L. monocytogenes*, 2402
Clostridia
Peroxyacetic acid and "blown pack" spoilage, 1434
Clostridium botulinum
Aspirin affects *C. botulinum* growth and toxin production, 2860
PCR-RFLP of *C. botulinum flaA*, 2133
Clostridium cochlearium
Inactivation of *Clostridium* spp. by polyphosphate and heat, 744
Clostridium perfringens
Control of *C. perfringens* spores by green tea leaf extracts, 1429
C. perfringens control in ground turkey during chilling, 218
C. perfringens growth in injected turkey during chilling, 923
Peptones and sporulation of *C. perfringens*, 1730
Clostridium sporogenes
Inactivation of *Clostridium* spp. by polyphosphate and heat, 744
Clove
Natural antimicrobials in pasteurized semiskimmed milk, 2757
Cluster analysis
Cluster analysis of EHEC O157 using VNTR typing, 2583
Coagulase genotype
Diversity in enterotoxigenic *S. aureus* from various food sources, 2541
Coating
Nisin-coated plastic films, 1267
Cocultivation
Factors influencing aggregation of *L. delbrueckii* subsp. *bulgaricus*, 223
Coffee moisture content
Coffee bean moisture content during transportation, 164
Coffee transportation
Coffee bean moisture content during transportation, 164
Cold
Detection of stressed *E. coli* O157:H7 in beef, 1663
Cold-smoked salmon
Enhancing growth of LAB in cold-smoked salmon by natural means, 1607
Cold storage
Cold-storage contamination, 1037
Colicin
Colicin E1 kills *L. monocytogenes*, 1256
Coliforms
Microbiological guidelines for milled cereal grains, 1041
Colonization
Colonization of *Salmonella* on tomatoes, 30
Vaccination of cattle against *E. coli* O157:H7, 2568
Color
Stability of cooked sausages made from blood cells, 1181
Commercial travel
Outbreaks implicating food workers, 1975
Communication
Agroterrorism: Where are we in the ongoing war on terrorism?, 791
Comparison of proportions
Pathogen detection, 1933
Competition
Competition between *P. fluorescens* and *E. coli* O157:H7, 1739
Dadih isolated strain properties against pathogen adhesion, 700
Competitive and sandwich enzyme-linked immunosorbent assays
Immunoassay for detection of β-lactoglobulin in food, 1691
Competitive exclusion
Competitive inhibition of *Salmonella*, 1804
Competitive exclusion bacteria
Bacteria from poultry inhibitory to pathogens, 867
Defined competitive exclusion bacteria for poultry, 874
Competitive inhibition
Competitive inhibition of *Salmonella*, 1804
Compost extract
Food safety implications of a popular farming practice: compost tea, 828
Composting
Fate of *E. coli* O157:H7 during composting, 2708
Computer simulation
Heat resistance of *E. coli* in test tubes of different sizes, 851
Confocal laser scanning microscopy
Campylobacter biofilms on stainless steel, 1379
Consumer
Consumer guidelines for cooking poultry products, 251
Consumer survey
Consumer home refrigeration practices, 1640
Consumer knowledge and use of open dates, 1213
Consumption pattern
Consumption patterns of fresh-cut salads and temperature, 2407
Contamination
L. innocua in aerosol studies, 1857
Salmonella contamination of non–United Kingdom eggs, 2259
Contamination level
Isolation of *L. monocytogenes* in seafood products, 891
Contamination profile
Contamination profile of *Listeria* spp. in RTE chicken products, 85
Contamination source
L. monocytogenes 4b in a food ingredient, 1513
Sources of *S. aureus* contamination in alheira, 685
Control measures
Foodborne *Salmonella* Enteritidis outbreak, 35
Conveyor belt
Ultrasonic cleaning of conveyor belts, 758
Cooked meats
Microbiological safety of cooked meats, 943
Cooked sausage
Stability of cooked sausages made from blood cells, 1181
Cooking instructions
Consumer guidelines for cooking poultry products, 251
Cooking temperature
Consumer guidelines for cooking poultry products, 251
Corn
Bacterial antagonism of *Aspergillus* and *Fusarium*, 1615
Quality of irradiated frozen vegetables, 1901
Cow
Enterotoxic *S. aureus* from yak and cow milk, 1726
Cranberry juice concentrates
Pathogen survival in cranberry juice concentrates, 2072
Critical control point validation
Surrogate microorganisms for in-plant critical control point validation, 952
Cross-contamination
Logistic broiler processing to reduce *Campylobacter* colonization, 2549
Pathogen transfer from burgers, 109
Preventing fruit contamination with ClO_2, 629
Cross-reactivity
Bacteriophage-based enrichment and immunoassay method for *Salmonella*, 2235
Cryptosporidium hominis
Cryptosporidium from Italian lagoon clams, 494
Cryptosporidium parvum
Cryptosporidium from Italian lagoon clams, 494
Cucumbers
Safety of acidified cucumbers, 2638
Cultural variation
Chlorine tolerance of *L. monocytogenes* cultural variants, 1129
Curli
Attachment of *E. coli* O157:H7 to lettuce, 1339
Cutting
Cutting plants, 2906
Cutting boards
Efficacy of neutral electrolyzed water on cutting boards, 102
Cymbopogon martinii
C. martinii oil as botanical fumigant for insects in stored grain, 172

Cytokines
Lactobacillus spp. adhesion and chemokine stimulation, 125
Cytolysin
Safety of enterococci from Terrincho cheesemaking, 2161
Cytotoxicity
B. weihenstephanensis in liquid egg products, 2782
Cytotoxicities of *V. parahaemolyticus*, 348

Dadih
Dadih isolated strain properties against pathogen adhesion, 700
Dairy foods
Safety of enterococci from Terrincho cheesemaking, 2161
Dairy manure
Fate of *E. coli* O157:H7 during composting, 2708
Damage
Damage to *B. cereus* exosporium, 2346
Data collection approaches
Data collection for microbial risk assessment, 1744
Deaths
Outbreaks implicating food workers, 1975
Decontamination
Decontamination of fresh cantaloupes and peppers, 655
Decontamination of raspberries and strawberries using aqueous ozone, 1088
Effectiveness of lemon juice on *Salmonella* Typhimurium in stuffed mussels, 2847
Ozone decontamination of raspberries and strawberries, 1093
Decontamination treatments
Decontamination of beef cuts intended for mechanical tenderization, 1174
Dehydrated potato
B. cereus in potato products, 514
Deli meat
Impact of dilution ratios on *L. monocytogenes* growth, 2656
Deli turkey
Surface pasteurization with liquid smoke extracts to control *Listeria*, 2749
Dependent samples
Pathogen detection, 1933
Depletion
Depletion of enrofloxacin and ciprofloxacin in white leghorn hens, 1952
Depuration
Binding of recombinant norovirus to gastrointestinal cells in bivalves, 2140
Desiccation
Desiccation survival of *E. sakazakii* and other *Enterobacteriaceae*, 2111
Detection
BAX detection of foodborne salmonellae, 835
Detection of *Salmonella* by immunocapture real-time PCR, 1002
Evaluation of *E. sakazakii* detection methods, 1678
Nematode detection through multispectral imaging, 1890
Rapid virus detection in shellfish, 967
Detection methods
Listeria media and results bias, 2851
Dew gram
Radiation processing of sprout seeds, 1961
Diacetate
Fate of *L. monocytogenes* with a combination of lactate and diacetate, 2620
Listeria monocytogenes growth boundary model, 70
Diagnosis
Sarcocystis hominis in minced beef in Belgium, 1523
Diarrheal disease
Bacterial pathogens in sago starch, 2868
Dietary exposure
Natural occurrence and risk estimates for aflatoxin B_1, 2824
Digestion
New pepsin formulation, 2896
Digestion assay
Proficiency samples for trichinellosis diagnosis, 1685
Dilution ratios
Impact of dilution ratios on *L. monocytogenes* growth, 2656
3,2′-Dimethyl-4-amino-bipenyl
Mechanisms of antimutagenicity in fermented soymilk, 1025
Direct-fed microbial(s)
DFM as an intervention for *E. coli* O157:H7 in cattle, 287
DFM intervention strategy for *E. coli* O157 and *Salmonella*, 2386
DFM intervention strategy for *E. coli* O157 in cattle, 1252
Disaster recovery
Poultry plant recovery after Katrina, 1498
Disinfectant
Efficacy of neutral electrolyzed water on cutting boards, 102
Microsporidia inactivation by disinfectants and a sanitizer, 681
Disinfection
Chlorate, disinfection, and weaning age affect *Salmonella* in pigs, 1798
Displacement
Dadih isolated strain properties against pathogen adhesion, 700
Distribution
PCR and biochemical identification of *Listeria* spp., 1874
Domestic kitchen
Recovery and transfer of *Salmonella* Typhimurium, 2273
Donair
E. coli O157:H7 outbreak associated with beef donair, 1483
Dose
E-beam destruction of molds, 981
Dose-response
Dose-response of *L. monocytogenes* in guinea pigs, 1122
Two-dimensional hazard characterization, 363
Doxycycline
Antimicrobial resistance of *L. monocytogenes*, 2402
Drag swabs
Salmonella persistence in an almond orchard, 1784
Dried figs
Aflatoxins in Turkish dried figs, 1029
Dried fruits
E-beam destruction of molds, 981
Dry-cured meat
Production of secondary metabolites by terverticillate penicillia, 2829
Drying
Enhancing growth of LAB in cold-smoked salmon by natural means, 1607
Dry smoked meat sausages
Inhibition of spoilage fungi isolated from meat sausages, 1468
Dummy variables
Regression with dummy variables for modeling growth–no growth limits, 456
D-value
Influence of essential oils on *E. coli* in apple cider, 2089
Surrogate microorganisms for in-plant critical control point validation, 952

E-beam
E-beam destruction of molds, 981
EC Decision 471
Assessment of pig carcass hygiene systems, 432
Economics
Feed industry HACCP, 2819
EDTA
Synergistic effect between antibacterials, 1704
Education
Agroterrorism: Where are we in the ongoing war on terrorism?, 791
Efficiency of transfer
Transfer of *Listeria*, 1423
Eggborne
Foodborne *Salmonella*-caused outbreaks in Catalonia (Spain), 209
Egg product
B. weihenstephanensis in liquid egg products, 2782
Pathogen contamination of restricted eggs, 2004
Eggs
Prevalence of *Salmonella* in eggs, 1238

Salmonella contamination of non–United Kingdom eggs, 2259
Salmonella Enteritidis in FSIS products, 582
Salmonella penetration of various eggs, 623
Encapsulation
Antimicrobial activity of encapsulated eugenol in milk, 2631
Encephalitozoon
Microsporidia inactivation by disinfectants and a sanitizer, 681
Enrichment
Aerobic resuscitation of *Campylobacter*, 1099
Enrichment of *Listeria* in TSB, 53
Impact of dilution ratios on *L. monocytogenes* growth, 2656
Enrichment media
Detection of stressed *E. coli* O157:H7 in beef, 1663
Listeria media and results bias, 2851
Enrofloxacin
Depletion of enrofloxacin and ciprofloxacin in white leghorn hens, 1952
Enterobacter aerogenes
Growth of *Salmonella* Stanley and surrogate during sprouting, 316
Pathogen transfer from burgers, 109
Enterobacteriaceae
Assessment of pig carcass hygiene systems, 432
Desiccation survival of *E. sakazakii* and other *Enterobacteriaceae*, 2111
Enterobacter sakazakii
Desiccation survival of *E. sakazakii* and other *Enterobacteriaceae*, 2111
E. sakazakii in infant cereal, 1410
E. sakazakii in powered infant formula, 1579
E. sakazakii in reconstituted infant formula, 2095
Evaluation of *E. sakazakii* detection methods, 1678
High hydrostatic pressure resistance of *E. sakazakii*, 2281
Inhibition of *E. sakazakii* in infant formula, 2104
Mathematical modeling of microbial migration during alfalfa sprouting, 2602
Novel infrared bacterial sample preparation protocol, 1241
Enterococci
Dairy enterococci biodiversity and safety, 1561
Enterococcus
Enterococcus resistance in organic poultry, 1021
Persistence of antibiotic-resistant enterococci in raw milk cheese, 450
Surrogate microorganisms for in-plant critical control point validation, 952
Enterococcus faecium
Predicting nonisothermal inactivation, 1457
Enterohemorrhagic *Escherichia coli*
Cluster analysis of EHEC O157 using VNTR typing, 2583
Enterohemorrhagic *Escherichia coli* serovar O157
Toxigenic *E. coli* in foods, 2843
Enterotoxigenic *Staphylococcus aureus*
Enterotoxic *S. aureus* from yak and cow milk, 1726
Enterotoxin
B. weihenstephanensis in liquid egg products, 2782
Peptones and sporulation of *C. perfringens*, 1730
Phylogeny of *B. cereus* group isolates from traditional fermented foods, 1165
Enterotoxin typing
Toxigenic *S. aureus* in RTE food in Korea, 1153
Enteroviruses (EVs)
Virus detection in bivalve molluscs, 1475
Enumeration
Analytical utility of *Campylobacter* methodologies, 241
Campylobacter in New Zealand retail meats, 566
Enumeration of *E. coli* O157 in cattle feces, 1072
Number of *Salmonella* on chicken breast filet and health risk, 2045
Salmonella in uncooked retail meats, 1360
Enumeration methods
Enumeration of yeasts and molds, 2661
Environment
Antimicrobial resistance in *C. jejuni*, 736
E. coli O157:H7 on diverse farms, 6
Listeria recovery using one-ply composite tissues in an automated assay, 1263
Environmental persistence
Salmonella persistence in an almond orchard, 1784
Environmental surfaces
United Kingdom slaughterhouse hygiene trends, 1633
Enzyme-linked immunosorbent assay (ELISA)
Assessment of two ELISA tests, 692
IMS versus ELISA detection of *E. coli* O157 in cattle and beef samples, 2230
Salmonella ELISA diagnosis in pig serum and meat juice, 1246
Epidemic clones
Genetic markers in *L. monocytogenes* 4b isolates, 574
Epidemiological analysis
Foodborne *Salmonella* Enteritidis outbreak, 35
Epidemiology
Cryptosporidium from Italian lagoon clams, 494
Epidemiology of *Salmonella* in broiler production chain, 323
Equine
Real-time PCR assay for detection of *Salmonella*, 1080
Erwinia
Preventing fruit contamination with ClO_2, 629
Escherichia
Reduction of bacteria from hands to food, 2873
Escherichia coli
Antimicrobial drug resistance of cattle isolates, 551
Antimicrobial properties of tannins, 543
Bacteria on chickens before processing, 2056
Cellular fatty acids of *E. coli* as affected by ethanol, 616
E. coli O157:H7 detection in complex food matrices, 2651
E. coli O157:H7 detection in ground beef samples, 1670
Effect of negative ions on *E. coli*, 204
Heat resistance of *E. coli* in test tubes of different sizes, 851
Inactivation of *E. coli* by combined high pressure and temperature, 1587
Inactivation of nonpathogenic *E. coli* via high-pressure homogenization, 1007
Influence of essential oils on *E. coli* in apple cider, 2089
Integron prevalence in *E. coli* from swine and humans, 292
Internalization of *E. coli* into maize via the root, 471
Microbial survey of Ontario fruits and vegetables, 2864
Microbiological guidelines for milled cereal grains, 1041
Microbiology of kangaroo carcasses, 1249
Predicting nonisothermal inactivation, 1457
Safety of acidified cucumbers, 2638
Escherichia coli O157
Cattle transport and lairage effects on *E. coli* O157:H7, 280
DFM intervention strategy for *E. coli* O157 and *Salmonella*, 2386
DFM intervention strategy for *E. coli* O157 in cattle, 1252
Distribution of *E.coli* O157 and *Salmonella* on cattle, 1346
Enumeration of *E. coli* O157 in cattle feces, 1072
Food processing resistance in *E. coli* O157, 2617
IMS versus ELISA detection of *E. coli* O157 in cattle and beef samples, 2230
Escherichia coli O157:H7
Antimicrobial activity of encapsulated eugenol in milk, 2631
Attachment of *E. coli* O157:H7 to lettuce, 1339
Bioluminescent bioreporter for *E. coli* O157:H7, 1386
Cellular fatty acids of *E. coli* as affected by ethanol, 616
Decontamination of beef cuts intended for mechanical tenderization, 1174
Decontamination of fresh cantaloupes and peppers, 655
Detection of stressed *E. coli* O157:H7 in beef, 1663
DFM as an intervention for *E. coli* O157:H7 in cattle, 287
E. coli in cattle transport trucks, 2383
E. coli O157:H7 in American bison, 2555
E. coli O157:H7 in leafy vegetables, 1966
E. coli O157:H7 in swine feces, 1489
E. coli O157:H7 on diverse farms, 6
E. coli O157:H7 outbreak associated with beef donair, 1483
E. coli O157:H7 strain relatedness in U.S. beef processing, 1622
Efficacy of gamma radiation and aqueous chlorine on *E. coli*, 748
Efficacy of peroxyacetic acid formulation, 200

Evaluation of hide wash cabinet, 1076
Fate of *E. coli* O157:H7 during composting, 2708
Heat inactivation of *E. coli* O157:H7 and *Salmonella* on alfalfa seeds, 1698
Impact of antibiotic stress, 194
Impact of transportation on pathogen prevalence in cattle, 17
Pathogen survival in cranberry juice concentrates, 2072
Pathogen transfer from burgers, 109
Predicting pathogen growth in raw meats, 1446
Pressure resistance of *E. coli* O157:H7 and *Salmonella*, 2078
Proteome analysis of virulence factor by AI-2–like activity, 300
Rapid simultaneous detection of five foodborne pathogenic bacteria, 1656
Real-time PCR and IMS for *E. coli* O157:H7, *Salmonella*, and *Shigella*, 1366
RIMS of *E. coli* O157:H7, 2717
Vaccination for preharvest *E. coli* O157:H7 intervention, 2561
Vaccination of cattle against *E. coli* O157:H7, 2568
Essential oil(s)
Antimicrobial activity of encapsulated eugenol in milk, 2631
Antimicrobial properties of films containing essential oils, 901
Influence of essential oils on *E. coli* in apple cider, 2089
Inhibition of carvacrol activity in steak tartare, 2127
Natural antimicrobials in pasteurized semiskimmed milk, 2757
Ethanol
Cellular fatty acids of *E. coli* as affected by ethanol, 616
Extraction of nisin using organic solvents, 1272
European Commission regulations
Aflatoxins in Turkish dried figs, 1029
Excision
In vitro comparison of methods for sampling of beef carcasses, 930
Expert elicitation
Attributing U.S. foodborne illness incidence estimates to foods, 1220
Export
Aflatoxins in Turkish dried figs, 1029
Expression analysis
S. xylosus lipase gene expression in vitro and in situ, 2665
Extended storage
Effect of extended storage on goat milk quality, 1281
External
Bacteria on chickens before processing, 2056
Extracellular polysaccharide
Factors influencing aggregation of *L. delbrueckii* subsp. *bulgaricus*, 223
Extraction
Extraction of nisin using organic solvents, 1272
Extraction method
Method for virus extraction from deli meat, 504

F2365
L. monoctyogenes F2365 shows atypical characteristics, 482
Factors
Outbreaks implicating food workers, 2199
FAPAS
Aflatoxins in Turkish dried figs, 1029
Farm
E. coli O157:H7 on diverse farms, 6
Farmed cod
Microflora of O_3-treated MA-packaged cod fillets, 2460
Fatty acid composition
Gamma radiation of edible molluscs and crustaceans, 958
Fatty acids
Antifungal activity of fatty acids, 1206
Feathers
Depletion of enrofloxacin and ciprofloxacin in white leghorn hens, 1952
Fecal prevalence
E. coli O157:H7 in American bison, 2555
Feces
Competitive inhibition of *Salmonella*, 1804
Distribution of *E.coli* O157 and *Salmonella* on cattle, 1346
E. coli O157:H7 in swine feces, 1489
Enumeration of *E. coli* O157 in cattle feces, 1072
IMS versus ELISA detection of *E. coli* O157 in cattle and beef samples, 2230
Real-time PCR assay for detection of *Salmonella*, 1080
Feed(s)
Cloth-based hybridization array system for mammalian species in feeds, 2900
Feed industry HACCP, 2819
Reproducibility study on feedstuff control, 986
Salmonella penetration of various eggs, 623
Feed ban
Cloth-based hybridization array system for mammalian species in feeds, 2900
Feedlot cattle
Salmonella shedding and antimicrobial resistance in feedlots, 476
Feline calicivirus
Survival of FCV, 500
Fermentation
Fermentation profile of lactic acid bacteria with neural networks, 1909
Use of *gfp* in monitoring *L. plantarum* N014, 419
Fermented foods
Antimicrobial susceptibility of food LAB, 2606
Fermented sausages
S. xylosus lipase gene expression in vitro and in situ, 2665
Fermented soymilk
Mechanisms of antimutagenicity in fermented soymilk, 1025
Film
C. botulinum toxin from flounder, 1159
Fish
Antimicrobial resistance of *L. monocytogenes*, 2402
Interlaboratory bias in the determination of mercury, 2422
Fish hydrolysate
Food safety implications of a popular farming practice: compost tea, 828
Flagellin
PCR-RFLP of *C. botulinum flaA*, 2133
Flounder
C. botulinum toxin from flounder, 1159
Flow conditions
Washing conditions affect the reduction of *E. coli* O157:H7 populations, 2533
Flow cytometry
Gastrointestinal microbiota of farm animals, 2799
Fluorescence in situ hybridization
Gastrointestinal microbiota of farm animals, 2799
Food
Antimicrobial-resistant *Salmonella*, 1334
BAX detection of foodborne salmonellae, 835
Food safety and young adults, 991
L. monocytogenes in Italian foods, 1507
Real-time PCR assay for detection of *Salmonella*, 1080
Resistance and genotypes of *Salmonella* strains from food, 2741
Ricin detection in beverages, 2377
Survival of FCV, 500
Food additives
Artificial sweetener effect on *Lactobacillus*, 2413
Food allergens
Immunoassay for detection of β-lactoglobulin in food, 1691
Food attribution
Attributing U.S. foodborne illness incidence estimates to foods, 1220
Foodborne
Prevalence of *Y. enterocolitica* in swine, 11
Foodborne hazards
Data collection for microbial risk assessment, 1744
Foodborne illnesses
Food safety practices among WIC clients, 1230
Foodborne illness incidence
Attributing U.S. foodborne illness incidence estimates to foods, 1220
Foodborne outbreak(s)
Outbreaks implicating food workers, 1752

Outbreaks implicating food workers, 1975
Outbreaks implicating food workers, 2199
Staphylococcus foodborne outbreak, 489
Foodborne pathogenic bacteria
Rapid simultaneous detection of five foodborne pathogenic bacteria, 1656
Foodborne pathogens
Alternative antimicrobials for food safety and hygiene, 425
Food safety implications of a popular farming practice: compost tea, 828
Nitro treatments against *Salmonella* and *E. coli*, 308
Plasma inactivation of pathogens on produce, 2290
Swine carcass baseline study, 1790
TiO_2/UV photocatalytic disinfection, 97
Foodborne transmission
HEV RNA in commercial porcine livers, The Netherlands, 2889
Foodborne viruses
Method for virus extraction from deli meat, 504
Food-chain safety
Gastrointestinal microbiota of farm animals, 2799
Food consumption
Determination of quantitative food consumption, 184
Food contact surfaces
Listeria recovery using one-ply composite tissues in an automated assay, 1263
Food contamination
Cold-storage contamination, 1037
Food grade
Food-grade production of pediocin PA-1 in *L. lactis*, 2512
Food handlers
Enterotoxigenic and antibiotic-resistant *S. aureus*, 2764
Outbreaks implicating food workers, 1752
Food handling
Food safety practices among WIC clients, 1230
Food isolates
Antimicrobial resistance of *L. monocytogenes*, 2402
Food pathogen detection
Enzymatic bio-nanotransduction, 841
Food pathogens
Food pathogens in soft cheeses, 47
Food preservatives
Inhibition of spoilage fungi isolated from meat sausages, 1468
Food processing environments
Biofilm formation by multidrug-resistant pathogens, 22
Food products
Plant extract inhibits bacterial growth in foods, 1600
Food safety
Chlorate, disinfection, and weaning age affect *Salmonella* in pigs, 1798
Food processing resistance in *E. coli* O157, 2617
Food safety and young adults, 991
Food safety practices among WIC clients, 1230
L. monocytogenes growth in asparagus, 753
Microbial food safety programs in Canada, 1286
Microbiological safety of cooked meats, 943
Safety of acidified cucumbers, 2638
Salmonella contamination of non–United Kingdom eggs, 2259
Young adult food safety behaviors and cognitions, 1917
Food safety behaviors
Self-reported versus observed food safety behaviors, 1927
Food safety objective
Applying FSO concept to *Salmonella* inactivation, 2036
Food service
L. monocytogenes at the retail and food service level, 2172
Food-service establishment
Shell egg use in food service industry, 2266
Food supplements
Anatoxin-a in food supplements, 776
Food workers
Factors related to food worker hand hygiene practices, 661
Outbreaks implicating food workers, 1752
Outbreaks implicating food workers, 1975
Outbreaks implicating food workers, 2199
Frankfurter(s)
Inactivation of *L. monocytogenes* on frankfurters, 1594
Inhibition of *Listeria* by liquid smoke extracts, 386
Surface pasteurization with liquid smoke extracts to control *Listeria*, 2749
Fresh cheese
Biopreservation of fresh cream cheese with *L. paracasei*, 228
Fresh-cut apple
Washing conditions affect the reduction of *E. coli* O157:H7 populations, 2533
Fresh-cut leafy green salads
Consumption patterns of fresh-cut salads and temperature, 2407
Fresh-cut vegetables
Irradiation of leaf-internalized *E. coli* O157:H7, 2526
Fresh leafy produce
RIMS of *E. coli* O157:H7, 2717
Fresh produce
Efficacy of gamma radiation and aqueous chlorine on *E. coli*, 748
Food safety implications of a popular farming practice: compost tea, 828
Frozen vegetables
Quality of irradiated frozen vegetables, 1901
Fructan
Biopreservation of fresh cream cheese with *L. paracasei*, 228
Fruit(s)
Microbial survey of Ontario fruits and vegetables, 2864
Preventing fruit contamination with ClO_2, 629
Fruit juices
Inactivation of *E. coli* by combined high pressure and temperature, 1587
Fumonisins
Fusarium and fumonisins in conventional and organic corn, 151
Function estimation
Pathogen detection, 1933
Fungicide
Chemical treatments on ochratoxigenic fungi of grapes, 157
Fusarium
Fusarium and fumonisins in conventional and organic corn, 151
Fusarium verticillioides
Bacterial antagonism of *Aspergillus* and *Fusarium*, 1615

Gamma radiation
Efficacy of gamma radiation and aqueous chlorine on *E. coli*, 748
Garden pea
Radiation processing of sprout seeds, 1961
Garlic oil
GO prevents TBT-induced oxidative damage, 716
Gastroenteritis
Postinfectious irritable bowel syndrome, 1762
Gastrointestinal cells
Binding of recombinant norovirus to gastrointestinal cells in bivalves, 2140
Gastrointestinal microbiota
Gastrointestinal microbiota of farm animals, 2799
gehM gene
S. xylosus lipase gene expression in vitro and in situ, 2665
Generally recognized as safe (GRAS)
Salmonella inactivation in LWE by irradiation, heat, and additives, 1402
Genetic markers
Genetic markers in *L. monocytogenes* 4b isolates, 574
Genetic resistance
Reducing *Salmonella* in pork, 2676
Gene transfer
Antimicrobial resistance in *Salmonella*, 780
Genome
L. monoctyogenes F2365 shows atypical characteristics, 482
Genotyping
Campylobacter clones in broiler farm and processing, 536
Geraniol
C. martinii oil as botanical fumigant for insects in stored grain, 172

Germination
Effect of SASP on spore germination under pressure and heat, 2168
gfp
Use of *gfp* in monitoring *L. plantarum* N014, 419
Global regression
Model fitting procedures in microbial growth, 2811
Glove use
Factors related to food worker hand hygiene practices, 661
Goat milk
Effect of extended storage on goat milk quality, 1281
Grapes
Chemical treatments on ochratoxigenic fungi of grapes, 157
Grape seed extract
Antimicrobial dipping against *L. monocytogenes*, 1017
Graphite furnace
Heavy metals in canned variegated scallops, 2911
Green coffee beans
Coffee bean moisture content during transportation, 164
Green fluorescent protein
Campylobacter biofilms on stainless steel, 1379
Green gram
Radiation processing of sprout seeds, 1961
Green olives
Fermentation profile of lactic acid bacteria with neural networks, 1909
Green tea extracts
Control of *C. perfringens* spores by green tea leaf extracts, 1429
Ground beef
Control of *C. perfringens* spores by green tea leaf extracts, 1429
Detection of *Salmonella* by immunocapture real-time PCR, 1002
Detection of stressed *E. coli* O157:H7 in beef, 1663
E. coli O157:H7 detection in complex food matrices, 2651
E. coli O157:H7 detection in ground beef samples, 1670
Real-time PCR and IMS for *E. coli* O157:H7, *Salmonella*, and *Shigella*, 1366
Growth
Bactericidal effects of heated sugars, 373
B. cereus in potato products, 514
L. monocytogenes growth in asparagus, 753
Growth boundaries
Effect of GRAS compounds on growth limits of *L. monocytogenes*, 2329
Growth boundary
Models for simultaneous growth of LAB and *L. monocytogenes*, 2485
Growth boundary model
Listeria monocytogenes growth boundary model, 70
Growth inhibition
C. perfringens control in ground turkey during chilling, 218
Growth–no growth model
Validation of a growth–no growth model of *L. monocytogenes*, 2118
Growth prediction
Predicting pathogen growth in raw meats, 1446
Growth rate
Environmental impact on Greek *A. carbonarius* isolates, 2884
Guinea pig
Dose-response of *L. monocytogenes* in guinea pigs, 1122

H5N1
Thermal inactivation of H5N1 HPAI in chicken meat, 674
Ham
Antimicrobial properties of films containing essential oils, 901
Effect of antimicrobials on *L. monocytogenes* in MAP ham, 2297
Fate of *L. monocytogenes* in commercial ham, 378
Listeria control in ready-to-eat meats, 2306
Hamburger
Pathogen transfer from burgers, 109
Ham processing
Penicillium in ham manufacturing plants, 975
Hand hygiene
Factors related to food worker hand hygiene practices, 661
Handling implements
Implements as reservoirs for bacterial contamination of some RTE foods, 2878
Hand washing
Factors related to food worker hand hygiene practices, 661
Reduction of bacteria from hands to food, 2873
Hazard analysis critical control point
Cider manufacturing practices and microbial concentrations, 1187
Feed industry HACCP, 2819
Inhibition of *Listeria* by liquid smoke extracts, 386
Predicting pathogen growth in raw meats, 1446
Pulsed-plasma decontamination of poultry wash water, 2805
Salmonella Enteritidis in FSIS products, 582
United Kingdom slaughterhouse hygiene trends, 1633
Hazard analysis critical control point validation
Contribution of humidity to *Salmonella* lethality, 762
Health behavior
Food safety and young adults, 991
Heat
Effect of SASP on spore germination under pressure and heat, 2168
Salmonella inactivation in LWE by irradiation, heat, and additives, 1402
Heat and mass transfer
Predictive model for *Listeria* in poultry thermal processing, 607
Heat-degraded
Bactericidal effects of heated sugars, 373
Heat inactivation
Inactivation of avian influenza virus, 667
Model for inactivation of *Camplyobacter*, 2023
Predicting nonisothermal inactivation, 1457
Heat resistance
Heat resistance of *E. coli* in test tubes of different sizes, 851
Heat shock protein gene
New primers for real-time PCR of *S. aureus*, 2855
Heat tolerance
Impact of antibiotic stress, 194
Heat treatment
Inactivation of *Clostridium* spp. by polyphosphate and heat, 744
Hepatitis
Hepatitis A outbreak associated with oyster consumption, 145
Hepatitis E virus
HEV RNA in commercial porcine livers, The Netherlands, 2889
Herb
Antimicrobial activity of herbs and spices, 641
Heterologous production
Heterologous production of pediocin PA-1 in *L. lactis*, 2792
Hide(s)
Distribution of *E.coli* O157 and *Salmonella* on cattle, 1346
E. coli O157:H7 strain relatedness in U.S. beef processing, 1622
Evaluation of hide wash cabinet, 1076
IMS versus ELISA detection of *E. coli* O157 in cattle and beef samples, 2230
Prevalence of *Listeria* in cull cattle at slaughter, 2578
High hydrostatic pressure
High hydrostatic pressure resistance of *E. sakazakii*, 2281
Inactivation of avian influenza virus, 667
Mathematical modeling of microbial migration during alfalfa sprouting, 2602
Model for inactivation of *Camplyobacter*, 2023
High-performance liquid chromatography (HPLC)
Analysis of patulin in foodstuffs, 2642
Fusarium and fumonisins in conventional and organic corn, 151
High pressure
Antibacterial effects of smoking and high pressure in fish, 399
Antimicrobial packaging and high pressure to control *L. monocytogenes*, 2498
High-pressure homogenization
Inactivation of nonpathogenic *E. coli* via high-pressure homogenization, 1007
High-pressure liquid chromatography (HPLC)
Aflatoxins in Turkish dried figs, 1029
Occurrence of naphthalene in honey, 1735
Production of secondary metabolites by terverticillate penicillia, 2829
High-pressure processing
Food processing resistance in *E. coli* O157, 2617

Inactivation of *E. coli* by combined high pressure and temperature, 1587
Pressure resistance of *E. coli* O157:H7 and *Salmonella*, 2078
High-throughput method
Enrichment of *Listeria* in TSB, 53
Histamine
Evaluation of PCR-SSCP for gram-negative histamine producers, 1200
Histamine-producing bacteria
Evaluation of PCR-SSCP for gram-negative histamine producers, 1200
Histidine decarboxylase gene database
Evaluation of PCR-SSCP for gram-negative histamine producers, 1200
Histo-blood group antigen
Binding of recombinant norovirus to gastrointestinal cells in bivalves, 2140
Home storage
Fate of *L. monocytogenes* in commercial ham, 378
Honey
Occurrence of naphthalene in honey, 1735
Hospital
L. monocytogenes in hospital sandwiches, 1958
Hospitalization
Outbreaks implicating food workers, 1975
Hot water
Brief sanitizing treatments of knives, 648
Household
Self-reported versus observed food safety behaviors, 1927
Household steam cleaning systems
Decontaminate beef and hog carcasses using a household steam cleaner, 635
Housing system
Salmonella penetration of various eggs, 623
HT29 cells
Lactobacillus spp. adhesion and chemokine stimulation, 125
htrA
New primers for real-time PCR of *S. aureus*, 2855
Human pathogen
Irradiation of leaf-internalized *E. coli* O157:H7, 2526
Humans
Antimicrobial resistance of *C. jejuni*, 729
Integron prevalence in *E. coli* from swine and humans, 292
Humic acid
Food safety implications of a popular farming practice: compost tea, 828
Hurdle technology
Combined action of AS-48 on *S. aureus*, 405
Hybridization
Cloth-based hybridization array system for mammalian species in feeds, 2900
Hydrophobic grid membrane filter
Novel isolation method for *Campylobacter*, 355
Hydrophobicity
Attachment of *E. coli* O157:H7 to lettuce, 1339
Hydroponic
Efficacy of gamma radiation and aqueous chlorine on *E. coli*, 748
Factors influencing aggregation of *L. delbrueckii* subsp. *bulgaricus*, 223

Ice cream
Salmonella from cake mix, 997
Identification
Antimicrobial susceptibility of food LAB, 2606
PCR and biochemical identification of *Listeria* spp., 1874
Imaging spectroscopy
Nematode detection through multispectral imaging, 1890
Immersion chilling
Chilling of poultry, 1829
Immune modulation
Inactivation of probiotics does not affect cytokine responses, 2417
Immunoassay
An assay to detect mustard seed protein, 179
Bacteriophage-based enrichment and immunoassay method for *Salmonella*, 2235
Immunocapture
Detection of *Salmonella* by immunocapture real-time PCR, 1002
Virus detection in bivalve molluscs, 1475
Immunochemistry
Assessment of two ELISA tests, 692
Immunomagnetic capture
Enzymatic bio-nanotransduction, 841
Immunomagnetic separation (IMS)
IMS versus ELISA detection of *E. coli* O157 in cattle and beef samples, 2230
Real-time PCR and IMS for *E. coli* O157:H7, *Salmonella*, and *Shigella*, 1366
Immunonanoparticles
Enhancing lysozyme activity using immunonanoparticles, 1844
Immunoreactivity
Immunoassay for detection of β-lactoglobulin in food, 1691
Imported beef trim
Imported beef trim, 440
Inactivation
Inactivation of nonpathogenic *E. coli* via high-pressure homogenization, 1007
L. monocytogenes inactivation by ultrasound and natural antimicrobials, 1850
Inactivation kinetics
High hydrostatic pressure resistance of *E. sakazakii*, 2281
Inactivation kinetics of *L. innocua* treated with pulsed light, 2518
Mathematical modeling of microbial migration during alfalfa sprouting, 2602
Indicator and spoilage microorganisms
Decontaminate beef and hog carcasses using a household steam cleaner, 635
Indicator bacteria
Salmonella and indicator bacteria on beef carcasses, 2732
Swine carcass baseline study, 1790
Indigenous food
Bacterial pathogens in sago starch, 2868
Induction seal
Leak detection using a vacuum decay tester, 2365
Infant cereal
E. sakazakii in infant cereal, 1410
Infant milk formula
Desiccation survival of *E. sakazakii* and other *Enterobacteriaceae*, 2111
E. sakazakii in powered infant formula, 1579
E. sakazakii in reconstituted infant formula, 2095
Evaluation of *E. sakazakii* detection methods, 1678
High hydrostatic pressure resistance of *E. sakazakii*, 2281
Inhibition of *E. sakazakii* in infant formula, 2104
Mathematical modeling of microbial migration during alfalfa sprouting, 2602
Infants
Food safety practices among WIC clients, 1230
Inflammation
Postinfectious irritable bowel syndrome, 1762
Infrared
Novel infrared bacterial sample preparation protocol, 1241
Inhibition
Alternative antimicrobials for food safety and hygiene, 425
Antimicrobial activity of encapsulated eugenol in milk, 2631
B. cereus and kefir, 2613
Dadih isolated strain properties against pathogen adhesion, 700
Injected turkey
C. perfringens growth in injected turkey during chilling, 923
Injury
Detection of stressed *E. coli* O157:H7 in beef, 1663
inlB
L. monoctyogenes F2365 shows atypical characteristics, 482
Inoculum size
Inactivation kinetics of *L. innocua* treated with pulsed light, 2518
In-package pasteurization
Combining antimicrobials with in-package pasteurization, 2503

Integrons
Integron prevalence in *E. coli* from swine and humans, 292
Interleukin
Inactivation of probiotics does not affect cytokine responses, 2417
Internal
Bacteria on chickens before processing, 2056
Internalization
Growth of *Salmonella* on and within tomatoes, 2725
Internalization of *E. coli* into maize via the root, 471
Internalization of *Salmonella* into lettuce via the root, 1717
Intervention
DFM as an intervention for *E. coli* O157:H7 in cattle, 287
Transmission of STEC by food, 2426
Vaccination for preharvest *E. coli* O157:H7 intervention, 2561
Validating antimicrobial interventions for poultry, 1393
Intervention treatments
Salmonella and indicator bacteria on beef carcasses, 2732
Inulin
Biopreservation of fresh cream cheese with *L. paracasei*, 228
invA
Real-time PCR assay for detection of *Salmonella*, 1080
Invasion
Characterization of *L. monocytogenes*, 592
Ionizing radiation
Quality of irradiated frozen vegetables, 1901
Ireland
Prevalence of *Salmonella* in eggs, 1238
Irradiation
Irradiation of leaf-internalized *E. coli* O157:H7, 2526
Quality of irradiated frozen vegetables, 1901
Salmonella inactivation in LWE by irradiation, heat, and additives, 1402
Irrigation water
Growth of *Salmonella* Stanley and surrogate during sprouting, 316
Irritable bowel syndrome
Postinfectious irritable bowel syndrome, 1762
Isoepoxydon dehydrogenase
PCR primers for patulin-producing *Penicillium* species, 2646
Isolates
Antimicrobial-resistant *Salmonella*, 1334
Isolation
Enrichment of *Listeria* in TSB, 53
Novel isolation method for *Campylobacter*, 355
Italy
Cryptosporidium from Italian lagoon clams, 494

Kangaroo
Microbiology of kangaroo carcasses, 1249
Kebab
E. coli O157:H7 outbreak associated with beef donair, 1483
Kefir
B. cereus and kefir, 2613
Kelp
Food safety implications of a popular farming practice: compost tea, 828
Kinetics
Inactivation of avian influenza virus, 667
Model for inactivation of *Camplyobacter*, 2023
Klebsiella pneumoniae
Novel infrared bacterial sample preparation protocol, 1241
Knives
Brief sanitizing treatments of knives, 648
Knowledge
Young adult food safety behaviors and cognitions, 1917
Koji mold
Identity and toxigenicity of *A. oryzae* and *A. sojae*, 2916
Koreans
Natural occurrence and risk estimates for aflatoxin B_1, 2824

Lactate
Antimicrobial packaging and high pressure to control *L. monocytogenes*, 2498
Listeria monocytogenes growth boundary model, 70
Lactate dehydrogenase
Cytotoxicities of *V. parahaemolyticus*, 348
Lactic acid
Decontamination of fresh cantaloupes and peppers, 655
Lactic acid bacteria
AFB_1 binding by lactic acid bacteria and *S. cerevisiae*, 2148
Antibiotic-resistant lactic acid bacteria in meat products, 557
Antimicrobial susceptibility of food LAB, 2606
Bacteriophage inhibition by phosphates, 1518
Enhancing growth of LAB in cold-smoked salmon by natural means, 1607
Fermentation profile of lactic acid bacteria with neural networks, 1909
Lactic acid bacteria in marinades, 766
Models for simultaneous growth of LAB and *L. monocytogenes*, 2485
Ochratoxin A removal by wine lactic acid bacteria, 2155
Probiotics and wheat allergy, 135
Safety of enterococci from Terrincho cheesemaking, 2161
Lactobacillus
Biopreservation of fresh cream cheese with *L. paracasei*, 228
Use of *gfp* in monitoring *L. plantarum* N014, 419
Lactobacillus acidophilus
DFM intervention strategy for *E. coli* O157 and *Salmonella*, 2386
DFM intervention strategy for *E. coli* O157 in cattle, 1252
Lactobacillus delbrueckii subsp. *bulgaricus*
Artificial sweetener effect on *Lactobacillus*, 2413
Factors influencing aggregation of *L. delbrueckii* subsp. *bulgaricus*, 223
Lactobacillus fermentum
Antibiotic susceptibility of heterofermentative lactobacilli, 412
Lactobacillus paracasei
Fermentation profile of lactic acid bacteria with neural networks, 1909
Lactobacillus plantarum
Fermentation profile of lactic acid bacteria with neural networks, 1909
Lactobacillus reuteri
Antibiotic susceptibility of heterofermentative lactobacilli, 412
Lactobacillus rhamnosus GG
Inactivation of probiotics does not affect cytokine responses, 2417
Lactobacillus sakei
Fermentation profile of lactic acid bacteria with neural networks, 1909
Lactobacillus salivarius
Defined competitive exclusion bacteria for poultry, 874
Lactococcus lactis
Food-grade production of pediocin PA-1 in *L. lactis*, 2512
Heterologous production of pediocin PA-1 in *L. lactis*, 2792
β-Lactoglobulin
Immunoassay for detection of β-lactoglobulin in food, 1691
Lactoperoxidase
Inhibition of *E. sakazakii* in infant formula, 2104
Lagoons
Cryptosporidium from Italian lagoon clams, 494
Lag phase
Environmental impact on Greek *A. carbonarius* isolates, 2884
Lateral flow immunoassay
Detection of stressed *E. coli* O157:H7 in beef, 1663
Lead
Heavy metals in canned variegated scallops, 2911
Leafy vegetables
E. coli O157:H7 in leafy vegetables, 1966
Leak detection
Leak detection using a vacuum decay tester, 2365
Lemon extract
Antimicrobial activity of lemon extract, 1896
Lemon extract in wine application, 114
Lemon juice
Effectiveness of lemon juice on *Salmonella* Typhimurium in stuffed mussels, 2847
Lesion
Nonthermal treatment of *Cyclospora* surrogate on produce, 2837
Lettuce
Attachment of *E. coli* O157:H7 to lettuce, 1339

Internalization of *Salmonella* into lettuce via the root, 1717
Leuconostoc mesenteroides
Fermentation profile of lactic acid bacteria with neural networks, 1909
Lightly preserved seafood
Models for simultaneous growth of LAB and *L. monocytogenes*, 2485
Lipolysis
S. xylosus lipase gene expression in vitro and in situ, 2665
Liquid chromatography
Depletion of enrofloxacin and ciprofloxacin in white leghorn hens, 1952
Liquid smoke
Inhibition of *Listeria* by liquid smoke extracts, 386
Liquid smoke derivatives
Surface pasteurization with liquid smoke extracts to control *Listeria*, 2749
Liquid whole egg (LWE)
Salmonella inactivation in LWE by irradiation, heat, and additives, 1402
Listeria
Effect of GRAS compounds on growth limits of *L. monocytogenes*, 2329
Effect of refrigeration on enumeration of chicken meat pathogens, 739
Effects of essential oils of oregano and nutmeg, 2626
Enrichment of *Listeria* in TSB, 53
Food-grade production of pediocin PA-1 in *L. lactis*, 2512
Pathogen contamination of restricted eggs, 2004
Predictive model for *Listeria* in poultry thermal processing, 607
Safety of acidified cucumbers, 2638
Listeria innocua
Effect of spectral range in pulsed light treatment, 909
Inactivation kinetics of *L. innocua* treated with pulsed light, 2518
L. innocua in aerosol studies, 1857
Listeria monocytogenes
Adhesion of *L. monocytogenes* to inert surfaces, 1569
Antibacterial effects of smoking and high pressure in fish, 399
Antimicrobial activity of encapsulated eugenol in milk, 2631
Antimicrobial dipping against *L. monocytogenes*, 1017
Antimicrobial packaging and high pressure to control *L. monocytogenes*, 2498
Antimicrobial properties of films containing essential oils, 901
Antimicrobial resistance of *L. monocytogenes*, 2402
Biofilm dryness and transfer, 2480
Characterization of *L. monocytogenes*, 592
Chlorine tolerance of *L. monocytogenes* cultural variants, 1129
Colicin E1 kills *L. monocytogenes*, 1256
Combining antimicrobials with in-package pasteurization, 2503
Consumer home refrigeration practices, 1640
Consumer knowledge and use of open dates, 1213
Consumption patterns of fresh-cut salads and temperature, 2407
Dose-response of *L. monocytogenes* in guinea pigs, 1122
Effectiveness of a *Listeria* recall notification, 2373
Effect of antimicrobials on *L. monocytogenes* in MAP ham, 2297
Effects of lactate and diacetate on proteins in *L. monocytogenes*, 58
Enhancing lysozyme activity using immunonanoparticles, 1844
Enumeration of *L. monocytogenes*, 1650
Fate of *L. monocytogenes* in commercial ham, 378
Genetic markers in *L. monocytogenes* 4b isolates, 574
Growth and acid resistance of *L. monocytogenes* on bologna, 65
Growth of *L. monocytogenes* in simulated smoked salmon, 2321
Growth on turkey meat and *Listeria* resistance, 2589
Impact of dilution ratios on *L. monocytogenes* growth, 2656
Imported beef trim, 440
Inactivation of *L. monocytogenes* on frankfurters, 1594
Inhibition of carvacrol activity in steak tartare, 2127
Inhibition of *Listeria* by liquid smoke extracts, 386
Isolation of *L. monocytogenes* in seafood products, 891
Leafy salad microbial quality, 1277
L. innocua in aerosol studies, 1857
Listeria control in ready-to-eat meats, 214
Listeria control in ready-to-eat meats, 2306
Listeria media and results bias, 2851
Listeria monocytogenes growth boundary model, 70
L. monocytogenes at the retail and food service level, 2172
L. monoctyogenes F2365 shows atypical characteristics, 482
L. monocytogenes 4b in a food ingredient, 1513
L. monocytogenes growth in asparagus, 753
L. monocytogenes inactivation by ultrasound and natural antimicrobials, 1850
L. monocytogenes in hospital sandwiches, 1958
L. monocytogenes in Italian foods, 1507
L. monocytogenes in Queso Fresco, 2596
Microbiological safety of cooked meats, 943
Model fitting procedures in microbial growth, 2811
Models for simultaneous growth of LAB and *L. monocytogenes*, 2485
Natural antimicrobials in pasteurized semiskimmed milk, 2757
Nisin-coated plastic films, 1267
Octanoic acid to reduce *L. monocytogenes* on RTE meats, 392
Pathogen survival in cranberry juice concentrates, 2072
Predicting nonisothermal inactivation, 1457
Prevalence of *Listeria* in cull cattle at slaughter, 2578
Rapid simultaneous detection of five foodborne pathogenic bacteria, 1656
Surface pasteurization with liquid smoke extracts to control *Listeria*, 2749
Survival of *L. monocytogenes* during the storage of sliced salami, 2313
Tracking of *L. monocytogenes* in a Taleggio plant, 1116
Transfer of *Listeria*, 600
Transfer of *Listeria*, 1423
Ultrasonic cleaning of conveyor belts, 758
Validation of a growth–no growth model of *L. monocytogenes*, 2118
Listeria monocytogenes contamination
L. monocytogenes contamination in a chilled food plant, 1866
Listeria monocytogenes Scott A
Fate of *L. monocytogenes* with a combination of lactate and diacetate, 2620
Listeria recovery
Listeria recovery using one-ply composite tissues in an automated assay, 1263
Listeria spp.
Contamination profile of *Listeria* spp. in RTE chicken products, 85
PCR and biochemical identification of *Listeria* spp., 1874
Listeriosis
Dose-response of *L. monocytogenes* in guinea pigs, 1122
Food safety practices among WIC clients, 1230
Risk assessment of *Listeria* in deli meats, 1137
Locus of control
Young adult food safety behaviors and cognitions, 1917
Logistic regression
Growth of *Salmonella* Stanley and surrogate during sprouting, 316
lux
Bioluminescent bioreporter for *E. coli* O157:H7, 1386
Lysozyme
Combining antimicrobials with in-package pasteurization, 2503
Enhancing lysozyme activity using immunonanoparticles, 1844

Macrolide resistance
Macrolide-resistant *Campylobacter*, 1945
Macrolides
Antimicrobial resistance of *C. jejuni*, 729
Maize
Bacterial antagonism of *Aspergillus* and *Fusarium*, 1615
Effect of azadirachtin against *S. oryzae* and *T. confusum* on grains, 1627
Internalization of *E. coli* into maize via the root, 471
Mammals
Cloth-based hybridization array system for mammalian species in feeds, 2900
Marinades
Lactic acid bacteria in marinades, 766
Marine edible organisms
PCBs and OCPs in seafood, 706
Maritime transportation
Coffee bean moisture content during transportation, 164

Marketed foods
Natural occurrence and risk estimates for aflatoxin B_1, 2824
Mass spectrometry
Depletion of enrofloxacin and ciprofloxacin in white leghorn hens, 1952
Production of secondary metabolites by terverticillate penicillia, 2829
Maternal child health
Food safety practices among WIC clients, 1230
McNemar test
Pathogen detection, 1933
Meat
Brief sanitizing treatments of knives, 648
Campylobacter spp. from meat in Korea, 860
Lactic acid bacteria in marinades, 766
Microbiology of kangaroo carcasses, 1249
Quantification of *Camplyobacter* spp. in raw chickens, 2015
Salmonella Enteritidis in FSIS products, 582
Thermal inactivation of H5N1 HPAI in chicken meat, 674
Meat inspection
New pepsin formulation, 2896
T. saginata cysticercosis detection by PCR-RFLP, 236
Meat juice
Salmonella ELISA diagnosis in pig serum and meat juice, 1246
Meat products
Meat product shelf life distribution, 1881
Mechanism
Mechanisms of antimutagenicity in fermented soymilk, 1025
Media
Isolation of *L. monocytogenes* in seafood products, 891
Melastoma candidum D. Don
Plant extract inhibits bacterial growth in foods, 1600
Mercury
Heavy metals in canned variegated scallops, 2911
Interlaboratory bias in the determination of mercury, 2422
Methanol
Extraction of nisin using organic solvents, 1272
Methods
Analytical utility of *Campylobacter* methodologies, 241
MIC
Antibiotic susceptibility of heterofermentative lactobacilli, 412
Inhibition of growth of *Salmonella* by natural antimicrobials, 2243
Micelles
Antimicrobial activity of encapsulated eugenol in milk, 2631
Microarray printing
Novel infrared bacterial sample preparation protocol, 1241
Microbial contamination
Food safety implications of a popular farming practice: compost tea, 828
Microbial examination of carcasses
In vitro comparison of methods for sampling of beef carcasses, 930
Microbial growth
Model fitting procedures in microbial growth, 2811
Microbial hazard characterization
Two-dimensional hazard characterization, 363
Microbial hazards
Microbial food safety programs in Canada, 1286
Microbial quality
Leafy salad microbial quality, 1277
Microbial reduction
Microbial reductions on blueberries using chlorine dioxide, 2084
Microbial risk assessment
Data collection for microbial risk assessment, 1744
Determination of quantitative food consumption, 184
Microbial spoilage
Antibacterial effects of smoking and high pressure in fish, 399
Microbiological analysis
Gamma radiation of edible molluscs and crustaceans, 958
Microbiological guidelines
Microbiological guidelines for milled cereal grains, 1041
Microbiological quality
Effect of extended storage on goat milk quality, 1281
Microbiological safety
Microbiological safety of Portuguese raw milk cheeses, 1710
Microbiological testing
United Kingdom slaughterhouse hygiene trends, 1633
Microbiology
Stability of cooked sausages made from blood cells, 1181
Microbiota
Microbiological guidelines for milled cereal grains, 1041
Microencapsulation
Extraction of nisin using organic solvents, 1272
Microflora
Inactivation of *E. coli* by combined high pressure and temperature, 1587
Quality of irradiated frozen vegetables, 1901
Microscopy
Reproducibility study on feedstuff control, 986
Microsporidia
Microsporidia inactivation by disinfectants and a sanitizer, 681
Milk
Aflatoxins in foods in Trinidad, 771
Antimicrobial activity of encapsulated eugenol in milk, 2631
Enterotoxic *S. aureus* from yak and cow milk, 1726
Immunoassay for detection of β-lactoglobulin in food, 1691
Psychrotolerant endospore-forming bacteria in milk, 2354
Real-time PCR for quantification of *S. aureus*, 90
Milled cereal grains
Microbiological guidelines for milled cereal grains, 1041
Minced pork
Evaluation of PCR method for detection of *Y. enterocolitica*, 335
Minimally processed vegetables
Leafy salad microbial quality, 1277
Model fitting procedures
Model fitting procedures in microbial growth, 2811
Modeling
Alternative antimicrobials for food safety and hygiene, 425
Effect of GRAS compounds on growth limits of *L. monocytogenes*, 2329
Inhibition of growth of *Salmonella* by natural antimicrobials, 2243
Models for simultaneous growth of LAB and *L. monocytogenes*, 2485
Model uncertainty
Model fitting procedures in microbial growth, 2811
Modified atmosphere
C. botulinum toxin from flounder, 1159
Effect of antimicrobials on *L. monocytogenes* in MAP ham, 2297
Modified atmosphere packaging
Acrylamide in breaded chicken products, 466
Carbon monoxide and carbon dioxide in MAP for pork sausage, 937
Inhibition of spoilage fungi isolated from meat sausages, 1468
Lactic acid bacteria in marinades, 766
Microflora of O_3-treated MA-packaged cod fillets, 2460
Prolonging the shelf life of caprese, 722
Moisture enhance
Decontamination of beef cuts intended for mechanical tenderization, 1174
Molds
E-beam destruction of molds, 981
Enumeration of yeasts and molds, 2661
Fusarium and fumonisins in conventional and organic corn, 151
Microbiological guidelines for milled cereal grains, 1041
Molecular subtyping
L. monocytogenes 4b in a food ingredient, 1513
Mollusc and crustacean irradiation
Gamma radiation of edible molluscs and crustaceans, 958
Monitoring
Swedish *Camplyobacter* program in broilers, 2001 through 2005, 2008
Monocaprylin
Inactivation of *L. monocytogenes* on frankfurters, 1594
Monoglycerides
Antifungal activity of fatty acids, 1206
Monte-Carlo analysis
Risk assessment of *Listeria* in deli meats, 1137

Monte Carlo simulation
Meat product shelf life distribution, 1881
Most probable number
Enumeration of *L. monocytogenes*, 1650
Number of *Salmonella* on chicken breast filet and health risk, 2045
Real-time PCR and MPN real-time PCR for *B. cereus* group species, 2774
Most probable number–immunomagnetic separation (MPN/IMS)
Enumeration of *E. coli* O157 in cattle feces, 1072
Mucus
Dadih isolated strain properties against pathogen adhesion, 700
Multianalyte assay
Enzymatic bio-nanotransduction, 841
Multidrug resistance
Antimicrobial resistance in *Salmonella*, 780
Multilocus sequence typing (MLST)
Molecular characterization of *V. parahaemolyticus*, 2396
Multiple correspondence analysis
Sources of *S. aureus* contamination in alheira, 685
Multiple drug resistance
Resistance of *Salmonella* from slaughtered pigs, 1502
Multiplex PCR
B. cereus in dried red pepper, 917
Detection of *Arcobacter* by multiplex PCR, 341
Multiplex PCR for detection of pathogenic *Yersinia* spp., 1110
PCR and biochemical identification of *Listeria* spp., 1874
Rapid simultaneous detection of five foodborne pathogenic bacteria, 1656
Toxigenic *E. coli* in foods, 2843
Multiplex real-time PCR
Real-time PCR and IMS for *E. coli* O157:H7, *Salmonella*, and *Shigella*, 1366
Multiresistance
Antimicrobial susceptibility testing, 1940
Mung bean
Effect of negative ions on *E. coli*, 204
Must
Chemical treatments on ochratoxigenic fungi of grapes, 157
Mustard
An assay to detect mustard seed protein, 179
Mycotoxin(s)
Analysis of patulin in foodstuffs, 2642
Feed industry HACCP, 2819
Fusarium and fumonisins in conventional and organic corn, 151
Identity and toxigenicity of *A. oryzae* and *A. sojae*, 2916
Mycotoxins in food, 509
Ochratoxin A removal by wine lactic acid bacteria, 2155
Production of secondary metabolites by terverticillate penicillia, 2829

Naphthalene
Occurrence of naphthalene in honey, 1735
Natural antimicrobials
Inhibition of growth of *Salmonella* by natural antimicrobials, 2243
Natural aromatic compounds
Inhibition of growth of *Salmonella* by natural antimicrobials, 2243
Natural compound
Antifungal activity of fatty acids, 1206
Antimicrobial activity of lemon extract, 1896
Natural microbial
Natural antimicrobials in pasteurized semiskimmed milk, 2757
Natural preservative
Lemon extract in wine application, 114
NeemAzal T/S
Effect of azadirachtin against *S. oryzae* and *T. confusum* on grains, 1627
Negative ions
Effect of negative ions on *E. coli*, 204
Nematode
Nematode detection through multispectral imaging, 1890
Nested PCR
Evaluation of PCR method for detection of *Y. enterocolitica*, 335
Nested real-time PCR
Method for virus extraction from deli meat, 504
Netherlands, The
HEV RNA in commercial porcine livers, The Netherlands, 2889
Neural networks
Fermentation profile of lactic acid bacteria with neural networks, 1909
Neurotoxin
Anatoxin-a in food supplements, 776
Neutral electrolyzed water
Efficacy of neutral electrolyzed water on cutting boards, 102
Nisin
Antimicrobial dipping against *L. monocytogenes*, 1017
Combining antimicrobials with in-package pasteurization, 2503
Extraction of nisin using organic solvents, 1272
Food-grade production of pediocin PA-1 in *L. lactis*, 2512
Inactivation of nonpathogenic *E. coli* via high-pressure homogenization, 1007
Nisin-coated plastic films, 1267
Nitrate
Nitro treatments against *Salmonella* and *E. coli*, 308
Nitrocompound
Nitro treatments against *Salmonella* and *E. coli*, 308
4-Nitroquinoline-*N*-oxide
Mechanisms of antimutagenicity in fermented soymilk, 1025
Nonintact beef
Decontamination of beef cuts intended for mechanical tenderization, 1174
Nonisothermal
Predicting nonisothermal inactivation, 1457
Nonspecific *Escherichia coli* enumeration
Poultry plant recovery after Katrina, 1498
Nonthermal treatment
Effect of spectral range in pulsed light treatment, 909
Normal phase high-performance liquid chromatography
Acrylamide in breaded chicken products, 466
Norovirus(es)
Binding of recombinant norovirus to gastrointestinal cells in bivalves, 2140
Outbreaks implicating food workers, 1752
Survival of FCV, 500
Virus detection in bivalve molluscs, 1475
Not ready-to-eat (NRTE)
Consumer guidelines for cooking poultry products, 251
Nutmeg
Effects of essential oils of oregano and nutmeg, 2626
Nutrient limitation
Competition between *P. fluorescens* and *E. coli* O157:H7, 1739
Nuts
E-beam destruction of molds, 981

O157
APC, *E. coli* O157:H7, *Salmonella*, and non-O157 STEC in lamb, 1811
Observed behaviors
Self-reported versus observed food safety behaviors, 1927
Occurrence
L. monocytogenes in Italian foods, 1507
Ochratoxin A
Chemical treatments on ochratoxigenic fungi of grapes, 157
Coffee bean moisture content during transportation, 164
Environmental impact on Greek *A. carbonarius* isolates, 2884
Ochratoxin A removal by wine lactic acid bacteria, 2155
Penicillium in ham manufacturing plants, 975
Octanoic acid
Octanoic acid to reduce *L. monocytogenes* on RTE meats, 392
Oikos 32 EC
Effect of azadirachtin against *S. oryzae* and *T. confusum* on grains, 1627
Olive oil
Food antimicrobials from olives, 1194
One-ply composite tissue
Listeria recovery using one-ply composite tissues in an automated assay, 1263

On-farm control
Microbial food safety programs in Canada, 1286
Online
Leak detection using a vacuum decay tester, 2365
Oocyst
Nonthermal treatment of *Cyclospora* surrogate on produce, 2837
Open air factor
Effect of ozone and OAF on *M. luteus*, 2769
Open dates
Consumer knowledge and use of open dates, 1213
Oral exposure
Dose-response of *L. monocytogenes* in guinea pigs, 1122
Orange juice
L. monocytogenes inactivation by ultrasound and natural antimicrobials, 1850
Oregano
Effects of essential oils of oregano and nutmeg, 2626
Oregano oil
C. perfringens control in ground turkey during chilling, 218
Organic
Enterococcus resistance in organic poultry, 1021
Organic acids
B. cereus and kefir, 2613
Inhibition of growth of *Salmonella* by natural antimicrobials, 2243
Regression with dummy variables for modeling growth–no growth limits, 456
Organic corn
Fusarium and fumonisins in conventional and organic corn, 151
Organic salts
Effect of GRAS compounds on growth limits of *L. monocytogenes*, 2329
Organic solvent
Extraction of nisin using organic solvents, 1272
Organochlorine pesticides
PCBs and OCPs in seafood, 706
Organoleptic characteristics
Gamma radiation of edible molluscs and crustaceans, 958
Outbreak(s)
E. coli O157:H7 outbreak associated with beef donair, 1483
Effectiveness of a *Listeria* recall notification, 2373
Foodborne *Salmonella*-caused outbreaks in Catalonia (Spain), 209
Hepatitis A outbreak associated with oyster consumption, 145
Rapid virus detection in shellfish, 967
Outbreak categories
Outbreaks implicating food workers, 2199
Outbreak investigation
Method for virus extraction from deli meat, 504
Oxidative damage
GO prevents TBT-induced oxidative damage, 716
Oysters (*Crassostrea virginica*)
Hepatitis A outbreak associated with oyster consumption, 145
Investigating *V. parahaemolyticus* using remote sensing, 879
Ozone
Decontamination of raspberries and strawberries using aqueous ozone, 1088
Effect of ozone and OAF on *M. luteus*, 2769
Microflora of O_3-treated MA-packaged cod fillets, 2460
Ozone decontamination of raspberries and strawberries, 1093
Pulsed-plasma decontamination of poultry wash water, 2805

Packaging
Microbiological safety of cooked meats, 943
Packaging migration
Cold-storage contamination, 1037
Paenibacillus
Psychrotolerant endospore-forming bacteria in milk, 2354
Pandemic group
Molecular characterization of *V. parahaemolyticus*, 2396
Parts
Validating antimicrobial interventions for poultry, 1393
Pasteurized milk
Natural antimicrobials in pasteurized semiskimmed milk, 2757
Pasteurized white asparagus
L. monocytogenes growth in asparagus, 753
Pathogen
Competition between *P. fluorescens* and *E. coli* O157:H7, 1739
Pathogenic *Y. enterocolitica*
Evaluation of PCR method for detection of *Y. enterocolitica*, 335
Pathogen kinetics
Predictive model for *Listeria* in poultry thermal processing, 607
Pathogen persistence
Recovery and transfer of *Salmonella* Typhimurium, 2273
Pathogens
Brief sanitizing treatments of knives, 648
Dadih isolated strain properties against pathogen adhesion, 700
Decontamination of raspberries and strawberries using aqueous ozone, 1088
Microbiological safety of Portuguese raw milk cheeses, 1710
Outbreaks implicating food workers, 1752
Outbreaks implicating food workers, 2199
Ozone decontamination of raspberries and strawberries, 1093
Preventing fruit contamination with ClO_2, 629
Patulin
Analysis of patulin in foodstuffs, 2642
PCR primers for patulin-producing *Penicillium* species, 2646
PCR
BAX detection of foodborne salmonellae, 835
Cloth-based hybridization array system for mammalian species in feeds, 2900
Detection of *Salmonella* by immunocapture real-time PCR, 1002
Detection of stressed *E. coli* O157:H7 in beef, 1663
E. coli O157:H7 in swine feces, 1489
Evaluation of *E. sakazakii* detection methods, 1678
Genetic markers in *L. monocytogenes* 4b isolates, 574
Sarcocystis hominis in minced beef in Belgium, 1523
Toxigenic *E. coli* in foods, 2843
PCR–denaturing gradient gel electrophoresis
Microflora of O_3-treated MA-packaged cod fillets, 2460
PCR primers
PCR primers for patulin-producing *Penicillium* species, 2646
PCR–restriction fragment length polymorphism (PCR-RFLP)
PCR-RFLP of *C. botulinum flaA*, 2133
T. saginata cysticercosis detection by PCR-RFLP, 236
PCR–single-strand conformational polymorphism
Evaluation of PCR-SSCP for gram-negative histamine producers, 1200
Peas
Quality of irradiated frozen vegetables, 1901
Pecorino cheese
Dairy enterococci biodiversity and safety, 1561
Pediocin PA-1
Food-grade production of pediocin PA-1 in *L. lactis*, 2512
Heterologous production of pediocin PA-1 in *L. lactis*, 2792
Pediococcus
Surrogate microorganisms for in-plant critical control point validation, 952
Pediococcus acidilactici
Heterologous production of pediocin PA-1 in *L. lactis*, 2792
Pelleted feed
Salmonella in processed chicken and feed, 2251
Penetration
Salmonella penetration of various eggs, 623
Penicillium
PCR primers for patulin-producing *Penicillium* species, 2646
Production of secondary metabolites by terverticillate penicillia, 2829
Penicillium nordicum
Penicillium in ham manufacturing plants, 975
Penicillium spp.
Antifungal activity of fatty acids, 1206
Peppers
Safety of acidified cucumbers, 2638

Pepsin
New pepsin formulation, 2896
Peptones
Peptones and sporulation of *C. perfringens*, 1730
Performance criterion
Applying FSO concept to *Salmonella* inactivation, 2036
Performance objective
Applying FSO concept to *Salmonella* inactivation, 2036
Peripheral blood mononuclear cells
Inactivation of probiotics does not affect cytokine responses, 2417
Peripheral nervous system
Cutting plants, 2906
Peroxyacetic acid (POAA)
Efficacy of peroxyacetic acid formulation, 200
Peroxyacetic acid and "blown pack" spoilage, 1434
Peroxyacids
Chemical decontaminants against pathogenic bacteria on poultry, 2063
Persistence
Characterization of *L. monocytogenes*, 592
Desiccation survival of *E. sakazakii* and other *Enterobacteriaceae*, 2111
pH
Fate of *L. monocytogenes* with a combination of lactate and diacetate, 2620
Phage(s)
Bacteriophage inhibition by phosphates, 1518
Reducing *Salmonella* in pork, 2676
Phage typing
Resistance and genotypes of *Salmonella* strains from food, 2741
Phenolic compounds
Antimicrobial properties of films containing essential oils, 901
Combined action of AS-48 on *S. aureus*, 405
L. plantarum wine phenolics degradation, 2670
Phenols
Antibacterial effects of smoking and high pressure in fish, 399
Phosphatase
Food pathogens in soft cheeses, 47
Phosphates
Bacteriophage inhibition by phosphates, 1518
Photocatalytic reaction
TiO_2/UV photocatalytic disinfection, 97
Photodiode array
Production of secondary metabolites by terverticillate penicillia, 2829
Phylogeny
Phylogeny of *B. cereus* group isolates from traditional fermented foods, 1165
Pig(s)
Assessment of pig carcass hygiene systems, 432
Chlorate, disinfection, and weaning age affect *Salmonella* in pigs, 1798
Gastrointestinal microbiota of farm animals, 2799
Stability of cooked sausages made from blood cells, 1181
Pig tonsils
Multiplex PCR for detection of pathogenic *Yersinia* spp., 1110
Planktonic cells
Chlorine tolerance of *L. monocytogenes* cultural variants, 1129
Plasma-treated polyethylene
Novel infrared bacterial sample preparation protocol, 1241
Plastic
Efficacy of neutral electrolyzed water on cutting boards, 102
Plastic films
Nisin-coated plastic films, 1267
Plesiomonas shigelloides
Cell-associated hemolysin in *P. shigelloides*, 885
Polychlorinated biphenyls
PCBs and OCPs in seafood, 706
Polyclonal antibody
An assay to detect mustard seed protein, 179
Polyester cloth
Cloth-based hybridization array system for mammalian species in feeds, 2900
Polyethylene terephthalate bottles
Leak detection using a vacuum decay tester, 2365
Polyphenols
Food antimicrobials from olives, 1194
Polyphosphate
Inactivation of *Clostridium* spp. by polyphosphate and heat, 744
Polystyrene
Adhesion of *L. monocytogenes* to inert surfaces, 1569
Cold-storage contamination, 1037
Polystyrene and glass
Attachment and biofilm formation by *Salmonella*, 2473
Porcine
Real-time PCR assay for detection of *Salmonella*, 1080
Porcine liver
HEV RNA in commercial porcine livers, The Netherlands, 2889
Pork
Antimicrobial activity of herbs and spices, 641
Control of *C. perfringens* spores by green tea leaf extracts, 1429
Salmonella ELISA diagnosis in pig serum and meat juice, 1246
Pork production
Reducing *Salmonella* in pork, 2676
Pork sausage
Carbon monoxide and carbon dioxide in MAP for pork sausage, 937
Portuguese raw milk cheeses
Microbiological safety of Portuguese raw milk cheeses, 1710
Postharvest
Growth of *Salmonella* on and within tomatoes, 2725
Postlethality treatment
Octanoic acid to reduce *L. monocytogenes* on RTE meats, 392
Potassium lactate
Effect of antimicrobials on *L. monocytogenes* in MAP ham, 2297
Fate of *L. monocytogenes* with a combination of lactate and diacetate, 2620
Potassium lactate–sodium diacetate blend
Effect of antimicrobials on *L. monocytogenes* in MAP ham, 2297
Potato salad
Detection of *Salmonella* by immunocapture real-time PCR, 1002
Poultry
Analytical utility of *Campylobacter* methodologies, 241
Antibiotic-resistant lactic acid bacteria in meat products, 557
Bacteria from poultry inhibitory to pathogens, 867
Campylobacter contamination after transport, 40
Consumer guidelines for cooking poultry products, 251
Defined competitive exclusion bacteria for poultry, 874
Enterococcus resistance in organic poultry, 1021
Lactic acid bacteria in marinades, 766
Poultry plant recovery after Katrina, 1498
Prevalence of *Salmonella*, 2466
Pulsed-plasma decontamination of poultry wash water, 2805
Real-time PCR assay for detection of *Salmonella*, 1080
Salmonella Enteritidis in FSIS products, 582
Salmonella quinolone resistance in poultry, 2030
Validating antimicrobial interventions for poultry, 1393
Poultry decontaminants
Variation of *Salmonella* strains in resistance to decontaminants, 1835
Poultry decontamination
Chemical decontaminants against pathogenic bacteria on poultry, 2063
Poultry meat
Applying FSO concept to *Salmonella* inactivation, 2036
Poultry processing
Campylobacter on broiler carcasses, 1556
Poultry products
L. monocytogenes 4b in a food ingredient, 1513
Predictive model for *Listeria* in poultry thermal processing, 607
Salmonella in a poultry slaughterhouse, 1723
Poultry slaughterhouse
Salmonella in a poultry slaughterhouse, 1723
Prebiotic
Biopreservation of fresh cream cheese with *L. paracasei*, 228
Precooked breaded chicken
Acrylamide in breaded chicken products, 466
Predictive microbiology
L. monocytogenes growth in asparagus, 753

Regression with dummy variables for modeling growth–no growth limits, 456
Risk assessment of *Listeria* in deli meats, 1137
Predictive model
Model for inactivation of *Camplyobacter*, 2023
Predicting nonisothermal inactivation, 1457
Predictive model for *Listeria* in poultry thermal processing, 607
Pregnancy
Food safety practices among WIC clients, 1230
Preharvest
DFM as an intervention for *E. coli* O157:H7 in cattle, 287
Food safety implications of a popular farming practice: compost tea, 828
Growth of *Salmonella* on and within tomatoes, 2725
Vaccination for preharvest *E. coli* O157:H7 intervention, 2561
Vaccination of cattle against *E. coli* O157:H7, 2568
Preharvest food safety
DFM intervention strategy for *E. coli* O157 and *Salmonella*, 2386
DFM intervention strategy for *E. coli* O157 in cattle, 1252
Enumeration of *E. coli* O157 in cattle feces, 1072
Impact of transportation on pathogen prevalence in cattle, 17
Nitro treatments against *Salmonella* and *E. coli*, 308
Prerequisite programs
Feed industry HACCP, 2819
Preservatives
Regression with dummy variables for modeling growth–no growth limits, 456
Pressure
Effect of SASP on spore germination under pressure and heat, 2168
Prevalence
APC, *E. coli* O157:H7, *Salmonella*, and non-O157 STEC in lamb, 1811
B. cereus in potato products, 514
Campylobacter in New Zealand retail meats, 566
Chicken carcass contamination, 1820
Enterotoxigenic and antibiotic-resistant *S. aureus*, 2764
Isolation of *L. monocytogenes* in seafood products, 891
Prevalence of *Listeria* in cull cattle at slaughter, 2578
Prevalence of *Salmonella*, 2466
Prevalence of *Y. enterocolitica* in swine, 11
Salmonella in a poultry slaughterhouse, 1723
Salmonella in uncooked retail meats, 1360
Swedish *Camplyobacter* program in broilers, 2001 through 2005, 2008
Transmission of STEC by food, 2426
Turkey carcass contamination, 1350
Probability distribution (lognormal)
Determination of quantitative food consumption, 184
Probabilistic model
Regression with dummy variables for modeling growth–no growth limits, 456
Probes
Cloth-based hybridization array system for mammalian species in feeds, 2900
Probiotic(s)
Biopreservation of fresh cream cheese with *L. paracasei*, 228
Inactivation of probiotics does not affect cytokine responses, 2417
Lactobacillus spp. adhesion and chemokine stimulation, 125
Probiotics and wheat allergy, 135
Reducing *Salmonella* in pork, 2676
Processing
Fate of *L. monocytogenes* in commercial ham, 378
Transmission of STEC by food, 2426
Produce
Colonization of *Salmonella* on tomatoes, 30
Plasma inactivation of pathogens on produce, 2290
Produce safety
Decontamination of fresh cantaloupes and peppers, 655
Irradiation of leaf-internalized *E. coli* O157:H7, 2526
Production chain
Epidemiology of *Salmonella* in broiler production chain, 323
Product recall
Effectiveness of a *Listeria* recall notification, 2373
Proficiency samples
Proficiency samples for trichinellosis diagnosis, 1685
Prohibited
Cloth-based hybridization array system for mammalian species in feeds, 2900
Propionate
Listeria control in ready-to-eat meats, 214
Listeria control in ready-to-eat meats, 2306
Protective effect
GO prevents TBT-induced oxidative damage, 716
Protein
An assay to detect mustard seed protein, 179
Proteomics
Chlorine tolerance of *L. monocytogenes* cultural variants, 1129
Psychrotolerant
B. weihenstephanensis in liquid egg products, 2782
Psychrotolerant endospore-forming bacteria in milk, 2354
Public health
Cryptosporidium from Italian lagoon clams, 494
Pulsed-field gel electophoresis (PFGE)
Characterization of *V. parahaemolyticus*, 1011
Cluster analysis of EHEC O157 using VNTR typing, 2583
E. coli O157:H7 strain relatedness in U.S. beef processing, 1622
Genetic markers in *L. monocytogenes* 4b isolates, 574
Isolation of *L. monocytogenes* in seafood products, 891
Persistence of antibiotic-resistant enterococci in raw milk cheese, 450
Pulsed-field gel electrophoresis fingerprinting
Resistance and genotypes of *Salmonella* strains from food, 2741
Salmonella characterization, 1328
Pulsed light
Effect of spectral range in pulsed light treatment, 909
Inactivation kinetics of *L. innocua* treated with pulsed light, 2518
Pulsed power technologies
Pulsed-plasma decontamination of poultry wash water, 2805
Pulsotype
Adhesion of *L. monocytogenes* to inert surfaces, 1569
Puree
Effects of enterocin AS-48 on bacilli in vegetable foods, 2339

Q allele
Food processing resistance in *E. coli* O157, 2617
Quality
Meat product shelf life distribution, 1881
Quality of irradiated frozen vegetables, 1901
Quality assurance
Proficiency samples for trichinellosis diagnosis, 1685
Quantification
Enumeration of *C. jejuni* by q-PCR, 1373
Quantification of *Camplyobacter* spp. in raw chickens, 2015
Real-time PCR for quantification of *S. aureus*, 90
Quantitative PCR
Enumeration of *C. jejuni* by q-PCR, 1373
Quantitative risk analysis
Risk assessment of *Listeria* in deli meats, 1137
Quantitative risk assessment model
Number of *Salmonella* on chicken breast filet and health risk, 2045
Queso Fresco
L. monocytogenes in Queso Fresco, 2596
Quinolones
Antimicrobial resistance of *C. jejuni*, 729
Salmonella quinolone resistance in poultry, 2030
Quorum sensing
Bioluminescent bioreporter for *E. coli* O157:H7, 1386

Radiation processing
Radiation processing of sprout seeds, 1961
Radioimmunoassay
Aflatoxins in foods in Trinidad, 771
Random amplification of polymorphic DNA
Isolation of *L. monocytogenes* in seafood products, 891

Random amplified polymorphic DNA (RAPD)
B. cereus in dried red pepper, 917
Staphylococcus foodborne outbreak, 489
Random amplified polymorphic DNA PCR (RAPD-PCR) typing
Sources of *S. aureus* contamination in alheira, 685
Rapid detection
E. coli O157:H7 detection in complex food matrices, 2651
E. coli O157:H7 detection in ground beef samples, 1670
Raspberry
Decontamination of raspberries and strawberries using aqueous ozone, 1088
Nonthermal treatment of *Cyclospora* surrogate on produce, 2837
Ra value
Transfer of *Listeria*, 1423
Raw chicken
Salmonella and *Camplyobacter* in raw chicken, 1937
Raw meat
Diversity in enterotoxigenic *S. aureus* from various food sources, 2541
Predicting pathogen growth in raw meats, 1446
Raw milk
Antimicrobial resistance of *C. jejuni*, 729
Ready-to-eat
Colicin E1 kills *L. monocytogenes*, 1256
L. monocytogenes at the retail and food service level, 2172
Octanoic acid to reduce *L. monocytogenes* on RTE meats, 392
Salmonella Enteritidis in FSIS products, 582
Ready-to-eat food(s)
Consumer home refrigeration practices, 1640
Consumer knowledge and use of open dates, 1213
Implements as reservoirs for bacterial contamination of some RTE foods, 2878
Toxigenic *S. aureus* in RTE food in Korea, 1153
Ready-to-eat meat
Antimicrobial dipping against *L. monocytogenes*, 1017
Combining antimicrobials with in-package pasteurization, 2503
Listeria control in ready-to-eat meats, 214
Listeria control in ready-to-eat meats, 2306
Surface pasteurization with liquid smoke extracts to control *Listeria*, 2749
Ready-to-eat meat products
Survival of *L. monocytogenes* during the storage of sliced salami, 2313
Real-time PCR
Enumeration of *C. jejuni* by q-PCR, 1373
Enumeration of *L. monocytogenes*, 1650
New primers for real-time PCR of *S. aureus*, 2855
Quantification of *Camplyobacter* spp. in raw chickens, 2015
Real-time PCR and MPN real-time PCR for *B. cereus* group species, 2774
Real-time PCR assay for detection of *Salmonella*, 1080
Real-time PCR for quantification of *S. aureus*, 90
RIMS of *E. coli* O157:H7, 2717
Sesame seed detection in foods, 1033
Recirculating immunomagnetic separation
RIMS of *E. coli* O157:H7, 2717
Recovery method
L. monocytogenes in Queso Fresco, 2596
Recycling wash water
Pulsed-plasma decontamination of poultry wash water, 2805
Refrigeration
Effect of refrigeration on enumeration of chicken meat pathogens, 739
Refrigerator temperatures
Consumer home refrigeration practices, 1640
Regression equation
Salmonella ELISA diagnosis in pig serum and meat juice, 1246
Regression model
E-beam destruction of molds, 981
Relatedness
E. coli O157:H7 strain relatedness in U.S. beef processing, 1622
Relative humidity
Penicillium in ham manufacturing plants, 975
Remote sensing
Investigating *V. parahaemolyticus* using remote sensing, 879
Removal kinetics
Washing conditions affect the reduction of *E. coli* O157:H7 populations, 2533
Repetitive element sequence–based PCR (REP-PCR)
Antibiotic susceptibility of heterofermentative lactobacilli, 412
Phylogeny of *B. cereus* group isolates from traditional fermented foods, 1165
Reprocessing
Campylobacter on broiler carcasses, 1556
Reproducibility
Reproducibility study on feedstuff control, 986
Reservoirs
Implements as reservoirs for bacterial contamination of some RTE foods, 2878
Resistance
Enterococcus resistance in organic poultry, 1021
Growth on turkey meat and *Listeria* resistance, 2589
Resistance gene
Antibiotic susceptibility of animal bifidobacteria, 119
Resistance variation
Variation of *Salmonella* strains in resistance to decontaminants, 1835
Resonance frequency
E. coli O157:H7 detection in complex food matrices, 2651
E. coli O157:H7 detection in ground beef samples, 1670
Response surface methodology
Inactivation of *E. coli* by combined high pressure and temperature, 1587
Restaurant
Factors related to food worker hand hygiene practices, 661
Restricted eggs
Pathogen contamination of restricted eggs, 2004
Retail
Fate of *L. monocytogenes* in commercial ham, 378
L. monocytogenes at the retail and food service level, 2172
Retail delicatessen
Implements as reservoirs for bacterial contamination of some RTE foods, 2878
Retail meats
Campylobacter in New Zealand retail meats, 566
Retail stores
HEV RNA in commercial porcine livers, The Netherlands, 2889
Reverse transcriptase PCR–enzyme-linked immunosorbent assay (RT-PCR-ELISA)
Virus detection in bivalve molluscs, 1475
Review
E. coli O157:H7 in leafy vegetables, 1966
Rhizosphere
Bacterial antagonism of *Aspergillus* and *Fusarium*, 1615
Rhyzopertha dominica
C. martinii oil as botanical fumigant for insects in stored grain, 172
Ribotyping
Molecular characterization of *V. parahaemolyticus*, 2396
Ricin
Ricin detection in beverages, 2377
Risk
B. cereus in potato products, 514
Consumption patterns of fresh-cut salads and temperature, 2407
Risk assessment
Applying FSO concept to *Salmonella* inactivation, 2036
Shell egg use in food service industry, 2266
Risk communication
Risk assessment of *Listeria* in deli meats, 1137
Risk estimate
Natural occurrence and risk estimates for aflatoxin B_1, 2824
Risk factors
Chicken carcass contamination, 1820
Turkey carcass contamination, 1350
Roast beef
Contribution of humidity to *Salmonella* lethality, 762

Roller mills
Mycotoxins in food, 509
Root(s)
Internalization of *E. coli* into maize via the root, 471
Internalization of *Salmonella* into lettuce via the root, 1717
Ruditapes philippinarum
Cryptosporidium from Italian lagoon clams, 494

Saccharomyces cerevisiae
AFB_1 binding by lactic acid bacteria and *S. cerevisiae*, 2148
Regression with dummy variables for modeling growth–no growth limits, 456
Safety
Meat product shelf life distribution, 1881
Sago starch
Bacterial pathogens in sago starch, 2868
Salad vegetables
Irradiation of leaf-internalized *E. coli* O157:H7, 2526
Salmonella
Antibiotic resistance in broiler chicken production, 1316
Antimicrobial drug resistance of cattle isolates, 551
Antimicrobial resistance in *Salmonella*, 780
Antimicrobial-resistant *Salmonella*, 1334
APC, *E. coli* O157:H7, *Salmonella*, and non-O157 STEC in lamb, 1811
Applying FSO concept to *Salmonella* inactivation, 2036
Assessment of pig carcass hygiene systems, 432
Attachment and biofilm formation by *Salmonella*, 2473
Bacteria from poultry inhibitory to pathogens, 867
Bacteria on chickens before processing, 2056
Bacteriophage-based enrichment and immunoassay method for *Salmonella*, 2235
BAX detection of foodborne salmonellae, 835
Chicken carcass contamination, 1820
Chlorate, disinfection, and weaning age affect *Salmonella* in pigs, 1798
Colonization of *Salmonella* on tomatoes, 30
Competitive inhibition of *Salmonella*, 1804
Consumer guidelines for cooking poultry products, 251
Contribution of humidity to *Salmonella* lethality, 762
Decontaminate beef and hog carcasses using a household steam cleaner, 635
Decontamination of fresh cantaloupes and peppers, 655
Defined competitive exclusion bacteria for poultry, 874
Detection of *Salmonella* by immunocapture real-time PCR, 1002
DFM intervention strategy for *E. coli* O157 and *Salmonella*, 2386
Distribution of *E.coli* O157 and *Salmonella* on cattle, 1346
Effect of refrigeration on enumeration of chicken meat pathogens, 739
Epidemiology of *Salmonella* in broiler production chain, 323
Evaluation of hide wash cabinet, 1076
Feed industry HACCP, 2819
Foodborne *Salmonella*-caused outbreaks in Catalonia (Spain), 209
Growth of *Salmonella* on and within tomatoes, 2725
Heat inactivation of *E. coli* O157:H7 and *Salmonella* on alfalfa seeds, 1698
Impact of transportation on pathogen prevalence in cattle, 17
Imported beef trim, 440
Internalization of *Salmonella* into lettuce via the root, 1717
Leafy salad microbial quality, 1277
Microbial survey of Ontario fruits and vegetables, 2864
Microbiological guidelines for milled cereal grains, 1041
Microbiology of kangaroo carcasses, 1249
Number of *Salmonella* on chicken breast filet and health risk, 2045
Pathogen contamination of restricted eggs, 2004
Pathogen survival in cranberry juice concentrates, 2072
Postinfectious irritable bowel syndrome, 1762
Poultry plant recovery after Katrina, 1498
Predicting pathogen growth in raw meats, 1446
Pressure resistance of *E. coli* O157:H7 and *Salmonella*, 2078
Prevalence of *Salmonella*, 2466
Preventing fruit contamination with ClO_2, 629
Radiation processing of sprout seeds, 1961
Rapid simultaneous detection of five foodborne pathogenic bacteria, 1656
Real-time PCR and IMS for *E. coli* O157:H7, *Salmonella*, and *Shigella*, 1366
Real-time PCR assay for detection of *Salmonella*, 1080
Reducing *Salmonella* in pork, 2676
Resistance of *Salmonella* from slaughtered pigs, 1502
Safety of acidified cucumbers, 2638
Salmonella and *Camplyobacter* in raw chicken, 1937
Salmonella and indicator bacteria on beef carcasses, 2732
Salmonella contamination of non–United Kingdom eggs, 2259
Salmonella ELISA diagnosis in pig serum and meat juice, 1246
Salmonella from cake mix, 997
Salmonella inactivation in LWE by irradiation, heat, and additives, 1402
Salmonella in a poultry slaughterhouse, 1723
Salmonella in raw almonds, 820
Salmonella in uncooked retail meats, 1360
Salmonella penetration of various eggs, 623
Salmonella persistence in an almond orchard, 1784
Salmonella quinolone resistance in poultry, 2030
Salmonella shedding and antimicrobial resistance in feedlots, 476
Shell egg use in food service industry, 2266
Turkey carcass contamination, 1350
Variation of *Salmonella* strains in resistance to decontaminants, 1835
Salmonella characterization
Salmonella characterization, 1328
Salmonella enterica
Resistance and genotypes of *Salmonella* strains from food, 2741
Salmonella Enteritidis
Prevalence of *Salmonella* in eggs, 1238
Salmonella Enteritidis in FSIS products, 582
Salmonella Enteritidis phage type 4
Foodborne *Salmonella* Enteritidis outbreak, 35
Salmonella Infantis
Prevalence of *Salmonella* in eggs, 1238
Salmonella isolation
Salmonella in processed chicken and feed, 2251
Salmonella Montevideo
Prevalence of *Salmonella* in eggs, 1238
Salmonella occurrence
Salmonella in processed chicken and feed, 2251
Salmonella persistence in an almond orchard, 1784
Salmonella Senftenberg
Predicting nonisothermal inactivation, 1457
Salmonella Stanley
Growth of *Salmonella* Stanley and surrogate during sprouting, 316
Salmonella Typhimurium
Antimicrobial properties of films containing essential oils, 901
Effectiveness of lemon juice on *Salmonella* Typhimurium in stuffed mussels, 2847
Inhibition of growth of *Salmonella* by natural antimicrobials, 2243
Predicting nonisothermal inactivation, 1457
Recovery and transfer of *Salmonella* Typhimurium, 2273
Salmonella Typhimurium DT104
Biofilm formation by multidrug-resistant pathogens, 22
Salmonellosis
Salmonella contamination of non–United Kingdom eggs, 2259
Salt(s)
Growth of *L. monocytogenes* in simulated smoked salmon, 2321
Inhibition of growth of *Salmonella* by natural antimicrobials, 2243
Salting
Enhancing growth of LAB in cold-smoked salmon by natural means, 1607
Sampling error
Two-dimensional hazard characterization, 363
Sandwich
L. monocytogenes in hospital sandwiches, 1958
Sanitation
Food safety and young adults, 991

Sanitizer
Brief sanitizing treatments of knives, 648
Microsporidia inactivation by disinfectants and a sanitizer, 681
Pathogen transfer from burgers, 109
Sarcocystis species
Sarcocystis hominis in minced beef in Belgium, 1523
Sausage
Evaluation of PCR method for detection of *Y. enterocolitica*, 335
Scombroid poisoning
Evaluation of PCR-SSCP for gram-negative histamine producers, 1200
Screening
Salmonella ELISA diagnosis in pig serum and meat juice, 1246
SEA
Staphylococcus foodborne outbreak, 489
Seafood
Isolation of *L. monocytogenes* in seafood products, 891
Seafood safety
Characterization of *V. parahaemolyticus*, 1011
Seaweed
Food safety implications of a popular farming practice: compost tea, 828
sec-depent secretion
Heterologous production of pediocin PA-1 in *L. lactis*, 2792
Second-order modeling
Two-dimensional hazard characterization, 363
Self-reported behaviors
Self-reported versus observed food safety behaviors, 1927
Semisolid medium
Novel isolation method for *Campylobacter*, 355
Sensitivity analysis
Risk assessment of *Listeria* in deli meats, 1137
Sequence analysis
Antibiotic-resistant lactic acid bacteria in meat products, 557
Serotonin
Postinfectious irritable bowel syndrome, 1762
Serotype(s)
Characterization of *V. parahaemolyticus*, 1011
Salmonella Enteritidis in FSIS products, 582
Serotype 4b
L. monocytogenes 4b in a food ingredient, 1513
Serotyping
L. monocytogenes in Italian foods, 1507
Sesame seed
Sesame seed detection in foods, 1033
Setting
Foodborne *Salmonella*-caused outbreaks in Catalonia (Spain), 209
Shear
Damage to *B. cereus* exosporium, 2346
Shedding
Salmonella shedding and antimicrobial resistance in feedlots, 476
Sheep
APC, *E. coli* O157:H7, *Salmonella*, and non-O157 STEC in lamb, 1811
Sheep meat
Chinese medicinal herb extracts in raw sheep meat, 1440
Shelf life
Inhibition of spoilage fungi isolated from meat sausages, 1468
Microbiological safety of cooked meats, 943
Shell eggs
Shell egg use in food service industry, 2266
Shellfish
Rapid virus detection in shellfish, 967
Shiga-like toxins
Toxigenic *E. coli* in foods, 2843
Shiga toxigenic *Escherichia coli*
Imported beef trim, 440
Shiga toxin–producing *Escherichia coli*
APC, *E. coli* O157:H7, *Salmonella*, and non-O157 STEC in lamb, 1811
Shigella
Microbial survey of Ontario fruits and vegetables, 2864
Postinfectious irritable bowel syndrome, 1762
Real-time PCR and IMS for *E. coli* O157:H7, *Salmonella*, and *Shigella*, 1366
Reduction of bacteria from hands to food, 2873
Shigella sonnei
uspA of *S. sonnei*, 2392
Simulated gastric fluid
Growth and acid resistance of *L. monocytogenes* on bologna, 65
Sinks
Factors related to food worker hand hygiene practices, 661
Sitophilus oryzae
C. martinii oil as botanical fumigant for insects in stored grain, 172
Effect of azadirachtin against *S. oryzae* and *T. confusum* on grains, 1627
16S rDNA
Microflora of O_3-treated MA-packaged cod fillets, 2460
16S rRNA
Phylogeny of *B. cereus* group isolates from traditional fermented foods, 1165
Slaughter
Swine carcass baseline study, 1790
VTEC in cattle, 1493
Slaughtered pigs
Resistance of *Salmonella* from slaughtered pigs, 1502
Slaughterhouse
Campylobacter clones in broiler farm and processing, 536
United Kingdom slaughterhouse hygiene trends, 1633
Small acid-soluble proteins
Effect of SASP on spore germination under pressure and heat, 2168
Smoke compound
Growth of *L. monocytogenes* in simulated smoked salmon, 2321
Smoked fish
Antibacterial effects of smoking and high pressure in fish, 399
Smoked salmon
Growth of *L. monocytogenes* in simulated smoked salmon, 2321
Smoking
Enhancing growth of LAB in cold-smoked salmon by natural means, 1607
Sodium diacetate
Effects of lactate and diacetate on proteins in *L. monocytogenes*, 58
Sodium lactate
Effects of lactate and diacetate on proteins in *L. monocytogenes*, 58
Soft cheeses
Food pathogens in soft cheeses, 47
Soft wheat flour
Mycotoxins in food, 509
Soil
Bacterial antagonism of *Aspergillus* and *Fusarium*, 1615
Soleris system
Listeria recovery using one-ply composite tissues in an automated assay, 1263
Sorbate
Listeria control in ready-to-eat meats, 214
Listeria control in ready-to-eat meats, 2306
Sorbitol-negative *Escherichia coli*
Antibiotic resistance in broiler chicken production, 1316
Southern blotting
Antibiotic-resistant lactic acid bacteria in meat products, 557
Spain
Resistance and genotypes of *Salmonella* strains from food, 2741
Resistance of *Salmonella* from slaughtered pigs, 1502
Specified risk materials
Cutting plants, 2906
Spectral range
Effect of spectral range in pulsed light treatment, 909
Spice
Antimicrobial activity of herbs and spices, 641
Spinach
E. coli O157:H7 detection in complex food matrices, 2651
Spirulina
Anatoxin-a in food supplements, 776
Spoilage
C. botulinum toxin from flounder, 1159

Competition between *P. fluorescens* and *E. coli* O157:H7, 1739
Lactic acid bacteria in marinades, 766
Meat product shelf life distribution, 1881
Spoilage fungi
Inhibition of spoilage fungi isolated from meat sausages, 1468
Spoilage microorganisms
Prolonging the shelf life of caprese, 722
Spores
Peptones and sporulation of *C. perfringens*, 1730
Sporulation
Peptones and sporulation of *C. perfringens*, 1730
Sporulation conditions
Damage to *B. cereus* exosporium, 2346
Sprouts
Growth of *Salmonella* Stanley and surrogate during sprouting, 316
Radiation processing of sprout seeds, 1961
Stainless steel
Adhesion of *L. monocytogenes* to inert surfaces, 1569
Campylobacter biofilms on stainless steel, 1379
Standardization
Stability of cooked sausages made from blood cells, 1181
Staphylococcal enterotoxin
Diversity in enterotoxigenic *S. aureus* from various food sources, 2541
Enterotoxigenic and antibiotic-resistant *S. aureus*, 2764
Staphylococcal food poisoning
Diversity in enterotoxigenic *S. aureus* from various food sources, 2541
Staphylococcus foodborne outbreak, 489
Staphylococcus aureus
Combined action of AS-48 on *S. aureus*, 405
Enterotoxigenic and antibiotic-resistant *S. aureus*, 2764
New primers for real-time PCR of *S. aureus*, 2855
Predicting nonisothermal inactivation, 1457
Predicting pathogen growth in raw meats, 1446
Rapid simultaneous detection of five foodborne pathogenic bacteria, 1656
Real-time PCR for quantification of *S. aureus*, 90
Sources of *S. aureus* contamination in alheira, 685
Staphylococcus xylosus
S. xylosus lipase gene expression in vitro and in situ, 2665
Starter
Safety of enterococci from Terrincho cheesemaking, 2161
Steam treatment
Decontaminate beef and hog carcasses using a household steam cleaner, 635
Steers
Antimicrobial properties of tannins, 543
Stillbirth
Dose-response of *L. monocytogenes* in guinea pigs, 1122
Stone mills
Mycotoxins in food, 509
Storage atmosphere
Effect of GRAS compounds on growth limits of *L. monocytogenes*, 2329
Strain mixture
Listeria media and results bias, 2851
Strawberry
Decontamination of raspberries and strawberries using aqueous ozone, 1088
Street food
Effectiveness of lemon juice on *Salmonella* Typhimurium in stuffed mussels, 2847
Streptococcus cristatus
Defined competitive exclusion bacteria for poultry, 874
Stress
Aerobic resuscitation of *Campylobacter*, 1099
Detection of stressed *E. coli* O157:H7 in beef, 1663
Stuffed mussel
Effectiveness of lemon juice on *Salmonella* Typhimurium in stuffed mussels, 2847
stx
Toxigenic *E. coli* in foods, 2843
Sublethal injury
Effect of spectral range in pulsed light treatment, 909
Subtyping
Campylobacter in New Zealand retail meats, 566
Sugar
Bactericidal effects of heated sugars, 373
Surfaces
Survival of FCV, 500
Surface water
RIMS of *E. coli* O157:H7, 2717
Surrogate(s)
Growth of *Salmonella* Stanley and surrogate during sprouting, 316
L. innocua in aerosol studies, 1857
Surrogate microorganisms
Surrogate microorganisms for in-plant critical control point validation, 952
Surveillance
Agroterrorism: Where are we in the ongoing war on terrorism?, 791
Survey
Salmonella in raw almonds, 820
Survival
Bactericidal effects of heated sugars, 373
Pathogen survival in cranberry juice concentrates, 2072
Survival of FCV, 500
Survival of *L. monocytogenes* during the storage of sliced salami, 2313
Susceptibility
Antimicrobial susceptibility testing, 1940
Swabbing
In vitro comparison of methods for sampling of beef carcasses, 930
Sweden
Swedish *Camplyobacter* program in broilers, 2001 through 2005, 2008
Swine
Antibiotic-resistant lactic acid bacteria in meat products, 557
E. coli O157:H7 in swine feces, 1489
Integron prevalence in *E. coli* from swine and humans, 292
Prevalence of *Y. enterocolitica* in swine, 11
Swine carcass baseline study, 1790
Synbiotic
Biopreservation of fresh cream cheese with *L. paracasei*, 228
Synergism
Synergistic effect between antibacterials, 1704
Synthetic gastric fluid
Growth on turkey meat and *Listeria* resistance, 2589

Table olives
Regression with dummy variables for modeling growth–no growth limits, 456
Taenia saginata
T. saginata cysticercosis detection by PCR-RFLP, 236
Taleggio
Tracking of *L. monocytogenes* in a Taleggio plant, 1116
Tannins
Antimicrobial properties of tannins, 543
Tea
Food antimicrobials from olives, 1194
Tea catechins
Control of *C. perfringens* spores by green tea leaf extracts, 1429
Temperature
Consumption patterns of fresh-cut salads and temperature, 2407
Fate of *L. monocytogenes* with a combination of lactate and diacetate, 2620
Penicillium in ham manufacturing plants, 975
Test methods
Heat resistance of *E. coli* in test tubes of different sizes, 851
Test power
Pathogen detection, 1933
tet(S)
Antimicrobial susceptibility of food lab, 2606
Tetracycline
Antibiotic-resistant lactic acid bacteria in meat products, 557

Antimicrobial resistance of *C. jejuni*, 729
Antimicrobial resistance of *L. monocytogenes*, 2402
Thailand
Integron prevalence in *E. coli* from swine and humans, 292
Thermal decomposition
Interlaboratory bias in the determination of mercury, 2422
Thermal inactivation
Applying FSO concept to *Salmonella* inactivation, 2036
Surrogate microorganisms for in-plant critical control point validation, 952
Thermal inactivation of H5N1 HPAI in chicken meat, 674
Thermal lethality
Contribution of humidity to *Salmonella* lethality, 762
Thermal pasteurization
Cider manufacturing practices and microbial concentrations, 1187
Thermal processing
Predictive model for *Listeria* in poultry thermal processing, 607
Thermometer ownership
Consumer home refrigeration practices, 1640
Thin aggregative fimbriae
Attachment and biofilm formation by *Salmonella*, 2473
Thymol
C. perfringens control in ground turkey during chilling, 218
Prolonging the shelf life of caprese, 722
Synergistic effect between antibacterials, 1704
Time-temperature profiles
Meat product shelf life distribution, 1881
Timsen
Microsporidia inactivation by disinfectants and a sanitizer, 681
Tissue
Depletion of enrofloxacin and ciprofloxacin in white leghorn hens, 1952
Tissue culture
Cytotoxicities of *V. parahaemolyticus*, 348
Titanium dioxide
TiO_2/UV photocatalytic disinfection, 97
Tomato(es)
Colonization of *Salmonella* on tomatoes, 30
Detection of *Salmonella* by immunocapture real-time PCR, 1002
Growth of *Salmonella* on and within tomatoes, 2725
Preventing fruit contamination with ClO_2, 629
Total aerobic counts
Microbiological guidelines for milled cereal grains, 1041
Total viable counts
Assessment of pig carcass hygiene systems, 432
Toxigenic *Staphylococcus aureus*
Toxigenic *S. aureus* in RTE food in Korea, 1153
Toxin(s)
B. cereus and kefir, 2613
C. botulinum toxin from flounder, 1159
Traceability
Microbial food safety programs in Canada, 1286
Tracking of *L. monocytogenes* in a Taleggio plant, 1116
Tracing
Rapid virus detection in shellfish, 967
Sources of *S. aureus* contamination in alheira, 685
Traditional fermented food
Phylogeny of *B. cereus* group isolates from traditional fermented foods, 1165
Transfer
Transfer of *Listeria*, 600
Transfer of *Listeria*, 1423
Transmission
L. monocytogenes at the retail and food service level, 2172
Reduction of bacteria from hands to food, 2873
Transport
Cattle transport and lairage effects on *E. coli* O157:H7, 280
Transportation
Impact of transportation on pathogen prevalence in cattle, 17
Transport containers
Campylobacter contamination after transport, 40
Tribolium castaneum
C. martinii oil as botanical fumigant for insects in stored grain, 172
Tribolium confusum
Effect of azadirachtin against *S. oryzae* and *T. confusum* on grains, 1627
Tributyltin
GO prevents TBT-induced oxidative damage, 716
Trichinella
New pepsin formulation, 2896
Proficiency samples for trichinellosis diagnosis, 1685
Triclosan
Reduction of bacteria from hands to food, 2873
Trinidad
Aflatoxins in foods in Trinidad, 771
Trisodium phosphate
Chemical decontaminants against pathogenic bacteria on poultry, 2063
Tropomyosin
Gamma radiation of edible molluscs and crustaceans, 958
Trucks
E. coli in cattle transport trucks, 2383
Tryptic soy broth
Enrichment of *Listeria* in TSB, 53
Tsunami
Microsporidia inactivation by disinfectants and a sanitizer, 681
Turkey
Aflatoxins in Turkish dried figs, 1029
C. perfringens control in ground turkey during chilling, 218
Growth on turkey meat and *Listeria* resistance, 2589
Listeria control in ready-to-eat meats, 214
Listeria control in ready-to-eat meats, 2306
Occurrence of naphthalene in honey, 1735
Turkey carcass contamination, 1350
Turkey farm
Salmonella characterization, 1328
Two-dimensional gel electrophoresis
Proteome analysis of virulence factor by AI-2–like activity, 300
Two-dimensional model
Risk assessment of *Listeria* in deli meats, 1137
Two-step regression
Model fitting procedures in microbial growth, 2811
Tylosin
Macrolide-resistant *Camplyobacter*, 1945
Typing
Epidemiology of *Salmonella* in broiler production chain, 323

Ultrasonic cleaning
Ultrasonic cleaning of conveyor belts, 758
Ultrasound
L. monocytogenes inactivation by ultrasound and natural antimicrobials, 1850
Uncertainty
Two-dimensional hazard characterization, 363
Uncooked retail meats
Salmonella in uncooked retail meats, 1360
United Kingdom
L. monocytogenes in hospital sandwiches, 1958
United States
Effectiveness of a *Listeria* recall notification, 2373
Universal preenrichment broth
Salmonella from cake mix, 997
Universal stress protein
uspA of *S. sonnei*, 2392
U.S. Food Safety and Inspection Service
Salmonella Enteritidis in FSIS products, 582
uspA
uspA of *S. sonnei*, 2392
UV light
Effect of spectral range in pulsed light treatment, 909
UV light radiation
Cider manufacturing practices and microbial concentrations, 1187

Vaccination
Vaccination for preharvest *E. coli* O157:H7 intervention, 2561
Vaccination of cattle against *E. coli* O157:H7, 2568
Vacuum decay
Leak detection using a vacuum decay tester, 2365
Validation
Validating antimicrobial interventions for poultry, 1393
Validation of a growth–no growth model of *L. monocytogenes*, 2118
Vanillin
L. monocytogenes inactivation by ultrasound and natural antimicrobials, 1850
Variability
Two-dimensional hazard characterization, 363
Variable number of tandem repeats typing
Cluster analysis of EHEC O157 using VNTR typing, 2583
Variegated scallops
Heavy metals in canned variegated scallops, 2911
Veal
Efficacy of peroxyacetic acid formulation, 200
Vegetable foods
Effects of enterocin AS-48 on bacilli in vegetable foods, 2339
Vegetables
Diversity in enterotoxigenic *S. aureus* from various food sources, 2541
Microbial survey of Ontario fruits and vegetables, 2864
Vegetable soup
Inactivation of *E. coli* by combined high pressure and temperature, 1587
Verocytotoxin-producing *E. coli* (VTEC) O157
VTEC in cattle, 1493
Verocytotoxin-producing *E. coli* (VTEC) O26
VTEC in cattle, 1493
Vibrio parahaemolyticus
Characterization of *V. parahaemolyticus*, 1011
Cytotoxicities of *V. parahaemolyticus*, 348
Investigating *V. parahaemolyticus* using remote sensing, 879
Molecular characterization of *V. parahaemolyticus*, 2396
Rapid simultaneous detection of five foodborne pathogenic bacteria, 1656
VIDAS system
Salmonella in a poultry slaughterhouse, 1723
Virulence
Dairy enterococci biodiversity and safety, 1561
L. monocytogenes F2365 shows atypical characteristics, 482
Proteome analysis of virulence factor by AI-2–like activity, 300
Virulence factor
Characterization of *V. parahaemolyticus*, 1011
Virulence factor production
Impact of antibiotic stress, 194
Virulence genes
E. coli O157:H7 in swine feces, 1489
Viruses
Hepatitis A outbreak associated with oyster consumption, 145
Rapid virus detection in shellfish, 967
Volatile phenols
L. plantarum wine phenolics degradation, 2670
Vomitoxin
Mycotoxins in food, 509
Vulnerability
Agroterrorism: Where are we in the ongoing war on terrorism?, 791
Washing mode
Washing conditions affect the reduction of *E. coli* O157:H7 populations, 2533
Wastewater
Detection of *Arcobacter* by multiplex PCR, 341
Water
Antimicrobial resistance of *C. jejuni*, 729
Preventing fruit contamination with ClO_2, 629
Water activity
E. sakazakii in powered infant formula, 1579
Waterborne hazards
Data collection for microbial risk assessment, 1744
Weibull model
Inactivation kinetics of *L. innocua* treated with pulsed light, 2518
Wheat
Effect of azadirachtin against *S. oryzae* and *T. confusum* on grains, 1627
Wheat allergens
Probiotics and wheat allergy, 135
Wine
Food antimicrobials from olives, 1194
L. plantarum wine phenolics degradation, 2670
Ochratoxin A removal by wine lactic acid bacteria, 2155
Wine applications
Lemon extract in wine application, 114
Wine grapes
Environmental impact on Greek *A. carbonarius* isolates, 2884
Wine waste
L. plantarum wine phenolics degradation, 2670
Wood
Efficacy of neutral electrolyzed water on cutting boards, 102

Yak
Enterotoxic *S. aureus* from yak and cow milk, 1726
Yeasts
Enumeration of yeasts and molds, 2661
Microbiological guidelines for milled cereal grains, 1041
Yersinia
Effects of essential oils of oregano and nutmeg, 2626
Yersinia enterocolitica
Multiplex PCR for detection of pathogenic *Yersinia* spp., 1110
Yersinia pseudotuberculosis
Multiplex PCR for detection of pathogenic *Yersinia* spp., 1110
Young adults
Food safety and young adults, 991
Young adult food safety behaviors and cognitions, 1917

Zea mays
Bacterial antagonism of *Aspergillus* and *Fusarium*, 1615
Zearalenone
Mycotoxins in food, 509
Zone concept
Contamination profile of *Listeria* spp. in RTE chicken products, 85
Zoonosis
Sarcocystis hominis in minced beef in Belgium, 1523
z-Value
Influence of essential oils on *E. coli* in apple cider, 2089
Surrogate microorganisms for in-plant critical control point validation, 952
